BDS program outcome

At the end of BDS program dental graduates should acquire adequate knowledge, necessary skills and reasonable attitudes which are required for carrying out all activities appropriate to general dental practice involving prevention, diagnosis and treatment of anomalies and diseases of the teeth, mouth, jaws and associated tissues. The graduate also should understand the concept of community oral health education and be able to participate in rural health care delivery programmes existing in the country.

At the end of the program, graduates will be able to

PO1: Describe and identify normal and abnormal oral and paraoral structures, their development, function etc. which are relevant to the practice of Dentistry.

PO2: Record detailed history, perform oral and general physical examination, apply relevant diagnostic tests and interpret available clinical and laboratory data in order to generate differential diagnoses and to manage oral health disorders, as well as provide preventive dental care

PO3: Competent in taking intraoral radiographs and interpret oral radiological findings

PO4: Plan and perform appropriate treatments, including surgical procedures, for common oral disorders in adults as well as children.

PO5: Demonstrate laboratory skills required for performing dental procedures, fabrication of various appliances, prosthesis and use of dental materials

PO6: Identify and manage common medical emergencies encountered in general dental practice; refer patients who may require specialist care

PO7: demonstrate communication, interpersonal and managerial skills

PO8: Demonstrate the ability to continue learning to acquire knowledge about recent advances in dentistry

PO9: Understand global and national oral health needs, policies and regulatory frameworks relevant to oral health and function effectively as an oral health care team member

PO10: Demonstrate high standard of professional ethics and conduct and apply these in all aspects of professional life, and able to recognize and manage medico-legal, ethical and professional issues in dental practice

DEPARTMENT OF PROSTHODONTICS CROWN & BRIDGE

COURSE OUTCOME

PRECLINICAL PROSTHODONTICS

CO-01: The graduate students know the anatomical variations and alterations for arrangement of teeth in various ridge relations

CO- 02: The graduate students know the basic steps in preparation of tooth to receive various restorations on plaster models.

CO- 03: know the parts of cast partial denture, Understand the basic steps in fabricating a removable of Prosthodontics.

CO- 04: Understands the importance of various prosthesis, Basic parts of dental chair, Basic positions of Dental chair, Position of the operator and patient.

CO- 05: The graduate student is able of Pouring of impression, brief description of beading & boxing, Making of special trays with various materials with various spacer design, Preparation of master models.

CO- 06: Preparation of temporary & permanent denture bases, Preparation of occlusal rims, Orientation of occlusion rims on articulator, Arrangement of teeth, Processing of complete dentures.

CO- 07: Graduate student knows Arrangement of artificial teeth on mounted Articulator. Arrangement of teeth in different relations.

CO- 08: Basic steps in fabrication of removable partial denture, Modification of teeth, Repair of removable partial denture.

CO- 09: Graduate student knows to Repair and relining of complete denture.

CO- 10: Graduate is able to apply the current knowledge of dentistry in the best interest of the patients and the community.

DEPARTMENT OF PROSTHODONTICS CROWN & BRIDGE

COURSE OUTCOME

Course outcome (UG) The dental graduates during training in the institution should acquire knowledge, necessary skills & reasonable attitudes which are required for carrying out all activities appropriate to general dental practice involving prevention, diagnosis & treatment of anomalies & diseases of the teeth, mouth, jaws & associated tissues.

DENTAL MATERIALS

CO-01: Understands the uses, physical, mechanical, chemical composition, and biological properties of the materials.

CO-02: Understands the advantage and disadvantage of individual dental material and their right applications.

CO-03: Acquire the knowledge of significance of Trituration, Steps in casting procedure, Hygroscopic expansion, Properties of alginate material after impression making.

CO-04: Graduate student is able to manipulate the material in the appropriate way thus enhancing the properties of the material.

CO-05: Graduate student is able to perform the manipulation of dental plaster, dental stone, impression compound. Mixing of zinc oxide eugenol cement, Zinc phosphate cement, Polycarboxylate cement. Adaptation of shellac base plate(1ST BDS)

CO-06: Graduate student is able to perform the Manipulation of zinc oxide eugenol impression paste, irreversible hydrocolloid impression material, modeling wax, heat cure and auto polymerizing acrylic denture base resins (2nd BDS).

CO-08: Graduate is willing to apply the current knowledge of dentistry in the best interest of the patients and the community.

Department of Oral Medicine & Radiology

Course Outcome for BDS

Course outcome 1: (OMRCO1)

Should have the knowledge about differentiating normal oral structures with diseased structures in oral and maxillofacial region and refer to the concerned specialty for their management

Course outcome 2: (OMRCO2)

Should have an adequate knowledge about common laboratory investigations, advice and interpret their results.

Course outcome 3: (OMRCO3)

Should have adequate knowledge about medical complications that can arise while treating systemically compromised patients and take prior precautions / consent from the concerned medical specialist.

Course outcome 4: (OMRCO4)

Should be able to record a detailed case history and perform clinical examination of patients to arrive at a provisional diagnosis.

Course outcome 5: (OMRCO5)

Have adequate knowledge about radiation health hazards, radiations safety and protection.

Course outcome 6: (OMRCO6)

Competent to take intra-oral radiographs and interpret their radiographic findings.

Course outcome 7: (OMRCO7)

Gain adequate knowledge of various extra-oral radiographic procedures.

Course outcome 8: (OMRCO8)

Be aware of the importance of intra- and extra-oral radiographs in forensic identification and age estimation.

Course outcome BDS

CO1	Should attain knowledge in Basics of Child Psychology and behavior of child.
CO2	Should acquire theoretical knowledge on various behavior management techniques like non-pharmacological and pharmacological methods including sedation and general anesthesia
CO3	Should obtain theoretical knowledge on managing pediatric patients who require special health care needs
CO4	Should attain knowledge in diagnosis of dental caries in children and management of the same special emphasis on Early childhood caries and rampant caries.
CO5	Should acquire clinical skills in performing efficient restorative treatments with essential cements and adhesives in typodont models
CO6	Should acquire theoretical knowledge in growth and development of human jaws special emphasis on growth spurts and growth prediction.
CO7	Gain knowledge in preventive management with special emphasis on physical and chemical plaque control methods including flourides.
CO8	Gain knowledge about traumatic injuries with special emphasis on management of avulsion.
CO9	Attain knowledge about local anesthesia and skill in mastering giving different local anesthetic techniques, with management of its subsequent side effects and management. With mastering techniques in extraction of primary and permanent teeth
CO10	Should gain knowledge of taking radiographs in children and interpret radiological findings.

DEPARTMENT OF CONSERVATIVE DENTISTRY AND ENDODONTICS

COURSE OUTCOME : UG

- CO1 : Diagnose the common dental problems encountered in general dental practice including diagnosis of all carious lesions.**
- CO2 : Understand the uses, physical, mechanical and chemical composition and biological properties of restorative materials.**
- CO3 : Acquire thorough knowledge of the hand and rotary cutting instrumentation used for restorative and endodontic procedures.**
- CO4 : Develop the skills to manipulate dental restorative materials understanding their clinical significance and applications.**
- CO5 : To maintain the appropriate posture and position during interaction with the patient and performing procedures.**
- CO6 : Should be able to demonstrate recommended hand washing techniques and placement of personal protective barriers.**
- CO7 : Should be competent to perform restorative management for all types of carious lesion in phantom head models.**
- CO8 : Provide the restorative management for all the types of carious lesions with restorative materials such as silver amalgam, glass ionomer cement and resin composites.**
- CO9 : Perform clinical evaluation for deep carious lesion by adapting direct and indirect pulp capping procedures.**
- CO10 : Understand the principles of aesthetic procedures.**
- CO11 : To take a proper clinical history, examination of the patient, perform essential diagnostic procedures and other relevant tests and interpret them to come to a reasonable diagnosis in Endodontics.**

PROF. IN CHARGE

Course outcome (UG) The dental graduates during training in the institution should acquire knowledge, necessary skills & reasonable attitudes which are required for carrying out all activities appropriate to general dental practice involving prevention, diagnosis & treatment of anomalies & diseases of the teeth, mouth, jaws & associated tissues.

Course outcome 1: (ORTCO1)

Should have adequate knowledge about general principles and concepts of growth and development.

Course outcome 2: (ORTCO2)

Should have an adequate knowledge about development of dentition and occlusion.

Course outcome 3: (ORTCO3)

Should have adequate knowledge about differentiating basic concepts of normal occlusion and malocclusion

Course outcome 4: (ORTCO4)

Should have adequate knowledge about normal and abnormal habits influencing the occlusion and malocclusion.

Course outcome 5: (ORTCO5)

Should have adequate knowledge about differentiating skeletal and dental malocclusions

Course outcome 6: (ORTCO6)

Should be able to record a detailed case history and perform clinical examination of patients to arrive at a provisional diagnosis.

Course outcome 7: (ORTCO7)

Should have the knowledge about cephalometrics and model analysis.

Course outcome 8: (ORTCO8)

Should have the knowledge about status of growth with skeletal and dental maturity indicators and age factor influencing the treatment in orthodontics.

Email: ssdctumkur@gmail.com

Course outcome 9: (ORTCO9)

Should have adequate knowledge about preventive, interceptive, corrective and surgical orthodontics.

Course outcome 10: (ORTCO10)

Should have the knowledge about methods of gaining space including arch expansion, extraction, Distalization etc...

Course outcome 11: (ORTCO11)

Should have adequate knowledge about orthopedic and orthodontic appliances (removable and fixed mechanotherapy)

Course outcome 12: (ORTCO12)

Should have adequate knowledge about management of growing and non-growing skeletal malocclusions.

Course outcome 13: (ORTCO13)

Should have the knowledge about management of some of the common malocclusion like skeletal and dental class 1, class 2 and class 3 malocclusions.

Course outcome 14: (ORTCO14)

Should have adequate knowledge about management of different types of skeletal and dental malocclusions like open bite, deep bite, cross bite etc..

Course outcome 15: (ORTCO15)

Should have complete knowledge about comprehensive retention protocols and followup plan.

DEPARTMENT OF ORAL PATHOLOGY & MICROBIOLOGY

COURSE OUTCOMES - BDS

Subject :DENTAL ANATOMY & ORAL HISTOLOGY

At the end of the course students will be able to...

CO-1: understand and describe embryological aspects and physiology of oral and paraoral structures

CO-2: understand and describe histological aspects, functions, clinical considerations of oral and paraoral structures

CO-3: identify microscopic structures of normal oral and paraoral structures in histological slides

CO-4: understand, identify the morphology of all teeth and their eruption pattern, differentiate deciduous and permanent teeth and carve permanent teeth in wax.

At the end of course, the student would be able to:

Year	course Name	CO	Statement
Final Year BDS	Periodontology	CO1	The student now knows the normal anatomy of Oral mucosa, Gingiva and supporting structures of the teeth & differentiation between the normal and diseased structures of periodontium
		CO2	The student knows the periodontal conditions that could be manifestations of systemic conditions in the body and knowledge to refer patients to Specialists and Physicians whenever needed
		CO3	The student can now formulate statistical analysis of the common and rare conditions occurring in the given populations.
		CO4	The student now diagnoses periodontal conditions based on risk factors and formulate treatment plan to eliminate those risk factors.
		CO5	The student can identify social, economic, environmental and emotional determinants in periodontal health and disease conditions and take them into account for planned treatment. The student can now undertake preventive programs in the community

DEPARTMENT OF PROSTHODONTICS CROWN & BRIDGE

Post Graduate program outcome

After successful completion of MDS program in prosthodontics postgraduate should be capable to

PO1 : demonstrate knowledge to identify anatomical variations, to diagnose and plan treatment for patients requiring a Prosthodontic therapy.

PO2 : knowledge to read and interpret a radiograph and other investigations for the purpose of diagnoses treatment plan for edentulous jaws.

PO3 : Elicit relevant history and reform appropriate clinical examinations needed to evaluate the Age changes and Prosthodontic Therapy for aged.

PO4 : Implement clinical solutions in response to prosthodontic clinical problems by developing an evidence-based treatment plan and taking a holistic approach to solving problems and designing treatment plans

PO5 : Apply knowledge of biomaterial science to provide and tailor safe, effective prosthodontic solutions to patients, and diagnose failed restoration and provide Prosthodontic therapy and after care.

PO6 : The candidate should be able to restore the lost functions of the stomatognathic system namely speech, mastication etc to provide a quality health care for craniofacial region

PO7 : Perform clinical and Laboratory procedure with understanding of biomaterials, tissue conditions related to prosthesis and have competent dexterity and skill for performing clinical and laboratory procedures in fixed, removable, implant and maxillofacial TMJ, esthetics Prosthodontics.

PO8 : Acquire skill through adequate number of Crowns, Inlays, laminates F.P.D. covering all clinically, partial edentulous situation.

PO9: Develop an attitude to seek an opinion from allied medical and dental specialists as and when required and be willing to share knowledge and clinical experience with professional colleagues

PO 10: Adopt new techniques of prosthetic management developed from time to time-based on own research or critical appraisal of research literature which are in the best interest of the patient

PO11: Provide compassionate patient care and help in national health scenario and neighbouring regions for conditions relevant to the specialty of Prosthodontics irrespective of social status, caste, creed or religion of the patient.

PO12: Communicate with patients from diverse backgrounds including the ability to listen to, respond to, and provide appropriate information and obtaining a truly informed consent

PO13: Function as an effective team member / leader of a multi professional Prosthodontic team

PO14: Demonstrate a respect for human values, human rights and social responsibilities

PO15: Plan, organize and conduct both clinical and basic research project with an aim of publishing /present the research outcome in various scientific forums.

DEPARTMENT OF PROSTHODONTICS CROWN & BRIDGE

POSTGRADUATE COURSE OUTCOMES (COS)

- CO- 1: Knowledge of instruments, equipment, and research tools in Prosthodontics.
- CO- 2: Knowledge of Dental Material Science - Biological and biomechanical, bio-esthetics knowledge of using in laboratory and clinics including testing methods.
- CO- 3: Selection of cases and principles in treatment of edentulous patients, partial or complete by implant supported prosthesis.
- CO- 4: practice management, examinations, treatment planning, communication with patients, clinical and laboratory techniques materials and instrumentation requiring different aspects of prosthodontic therapy, Tooth and Tooth surface restoration.
- CO- 5: Acquired skill through adequate number of complete denture prosthesis and techniques higher clinical approach by utilizing semi-adjustable articulators, face bow and graphic tracing.
- CO- 6: Acquired skill through adequate numbers of R.P.D. covering all clinical partially edentulous situation
- CO- 7: Acquired skill through adequate number of Crowns, Inlays, laminates F.P.D. covering all clinically, partial edentulous situation.
- CO- 8: Skills of treating single edentulous situation by implant support, Diagnosis and treatment planning, 1st stage and 2nd stage implant surgery.
- CO- 9: Treating craniofacial defects, management of orofacial esthetics, prosthetic management of TMJ syndrome, occlusal rehabilitation, maintenance and management of filled restoration, Prosthodontic Management of patient with psychogenic origin, Practice of child and geriatric prosthodontics.
- CO- 10: Implants Prosthodontics - Rehabilitation of Partial Edentulous, Complete edentulism and for craniofacial rehabilitation. Failures in all aspects of Prosthodontics and its management

and after care, Team management for esthetics, TMJ syndrome and Maxillofacial and Craniofacial Prosthodontics

Management of Prosthodontics emergencies, resuscitation.

CO 11: Student should be able to display their knowledge through seminars, Journal Clubs, Case presentations, Problem Based learnings and Inter Departmental Meet.

CO 12: Students should be able to take minimum two theory classes per annum for undergraduate students.

CO 13: Students must attend and present scientific papers at CDE, conferences and workshops conducted in various scientific platforms and gain adequate knowledge on current concepts in Prosthodontics, crown and bridge.

CO- 14: Competent specialization in team management of craniofacial design.

CO-15: Student should be able to display effective interpersonal communication and managerial skills on patient care with ethical responsibilities.

Department of Pedodontics and Preventive Dentistry SSDC, Tumkur	
Program Outcome MDS - Pediatric and Preventive Dentistry	
PO1	Understanding normal and abnormal form and function of the human body in relevance to the pediatric population
PO2	Assessment of children's physical, mental and dental health and risk factors, diagnose a disease condition based on detailed history, clinical examination and interpretation of lab investigations and radiographs
PO3	Planning a comprehensive treatment protocol according to child's attitude and behaviour towards dentistry and dental health care needs
PO4	Propose a behaviour management technique (non pharmacological or pharmacological) suitable to the child's behavioural pattern towards quality dental treatment
PO5	Guiding parents and children towards prevention of dental diseases through diet counselling, oral health education and also towards traumatic dental injuries
PO6	Provide emergency as well as long term management at the event of traumatic dental injuries
PO7	Mastery and competency in skills using advanced restorative techniques based on a meticulous knowledge of materials science and metallurgy.
PO8	Provide preventive treatment against dental diseases including caries and malocclusion
PO9	Effectively treating dental problems in pediatric patients who are medically compromised, physically challenged and special children
PO10	Administration of local anesthetics, dental extractions and performing minor surgeries
PO11	Intercept deleterious oral habits and treat pediatric patients at risk of developing malocclusion along with growth modifications when necessary
PO12	Application of recent trends and advanced treatment modalities and approaches during pediatric dental practice
PO13	Follow social values while treating pediatric patients and instilling positive dental attitude in patients & parents
PO14	Respect child patients rights and privileges including their right to information and prevent identify and report child abuse and neglect

Course outcome MDS

CO1	Should attain theoretical knowledge on assessment of a child's physical and mental health
CO2	Should gain theoretical knowledge on analysing pediatric patient's behavior and attitude towards dental treatments by understanding their psychological and cognitive development
CO3	Should acquire theoretical knowledge on various behaviour management techniques like non-pharmacological and pharmacological methods including sedation and general anesthesia
CO4	Should obtain theoretical knowledge on managing pediatric patients who require special health care needs
CO5	Develop the understanding of dental caries disease dynamics, role of primary and secondary factors contributing to disease initiation and progression, the hypothesis involved in etio-pathogenesis of dental caries and epidemiology of dental caries
CO6	Should acquire clinical skills in performing efficient restorative treatments with essential cements and adhesives in typodont models
CO7	Should gain clinical and lab skills in fabrication of removable and fixed space maintainers, habit breaking appliances and removable orthodontic appliances in dental cast models
CO8	Should acquire theoretical knowledge on normal growth and development of humans, jaws and related structures; understanding growth spurts and growth prediction.
CO9	Clinically assess caries risk for pediatric patients, clinical skills to place Preventive resin restoration and atraumatic restorations
CO10	To formulate a diet diary and have the ability to counsel parents and patient for caries prevention emphasis on fluoride therapies, physical and chemical plaque control methods.
CO11	Should have skills to assess growth changes and provide appliances that help in growth modification and treat full-fledged malocclusions
CO12	Gain clinical skills in inducing sedation using nitrous oxide - oxygen sedation, intra nasal sedation, IV sedation and oral sedation
CO13	Acquire knowledge on drugs used for induction, maintenance and recovery in general anesthesia, planes of anesthesia and complications of general anesthesia

CO14	Understand the theoretical aspects of Strip crowns, Figarocrowns, zirconia crowns in primary dentition, stainless steel crowns, jacket crowns in permanent dentition
CO15	Acquire clinical skills in diagnosing deep carious lesions and management with pulp therapy emphasis on using endodontic microscopes,
CO16	Acquire clinical skills in performing emergency management for traumatic dental injuries with emphasis on management of Avulsion.
CO17	Acquire theoretical view on bleaching, micro and macroabrasions
CO18	Understanding the concept of Research Methodology, Biostatistics and manuscript writing
CO19	Attain knowledge about local anesthesia and skill in mastering giving different local anesthetic techniques, with management of its subsequent side effects and management. With mastering techniques in extraction of primary and permanent teeth.

DEPARTMENT OF CONSERVATIVE DENTISTRY AND ENDODONTICS

PROGRAM OUTCOME :PG

At the end of the program Post graduate will be able to,

PO1 :Perform physical and oral examination of the patient, take a proper chair side history and perform relevant tests and interpret them to come to reasonable diagnosis about the dental condition.

PO2 :Diagnose and recognize the conditions that may require multi-disciplinary approach and refer to an appropriate specialist.

PO3 : Perform infection control measures in the dental clinical environment and laboratories.

PO4 :Perform all levels of restorative work including esthetic procedures and management of complicated restorative procedures.

PO5 :Describe and manage the etiology, pathophysiology of pulpal and periapical diagnosis and management of common endodontic situations including trauma and endodontic-periodontic considerations.

PO6 :Diagnose, plan and execute challenging clinical cases requiring comprehensive management strategies using contemporary materials and techniques in the specialty of conservative dentistry and endodontics.

PO7 :Demonstrate communication skills in particular to explain various options available for management and to obtain a true informed consent from the patient.

PO8 :Apply moral and ethical standards while carrying on human or animal research.

DEPARTMENT OF CONSERVATIVE DENTISTRY AND ENDODONTICS

COURSE OUTCOME :PG

CO1 : To Understand the anatomy and physiology of the oral and peri-oral tissues with particular emphasis on endodontics .

CO2 : To Understand the etiology, pathobiology, clinical presentation of pulpal and peri radicular tissues.

CO3 : To Understand the impact of systemic diseases on oral tissues and oral diseases on systemic health.

CO4 : To understand the biomaterial science relevant to conservative dentistry and endodontics.

CO5 : To show professional judgement to implement clinical solutions in response to problems by developing evidence based treatment plan and holistic approach in solving problems and designing treatment plan.

CO6 : Demonstrate clinical proficiency in the delivery of preventive and interventional care as part of a holistic comprehensive treatment plan.

CO7 : Use the advance diagnostic tools and minimal and non invasive surgical tools require to apply the conservative and biological mode of treatment.

CO8 : To solve esthetic problems and plan for esthetic cavity design using different restorative materials and techniques.

CO9 : To apply the technical skills in endodontics based on radicular anatomy of the teeth and clinical cases diagnosed with vital and non vital pulpal diseases.

CO10 : Appraise systematically current evidence in endodontics and show evidence of the ability to assess research.

Post Graduate program outcome

After successful completion of MDS program in various specialties the postgraduate should be capable to

PO1 : Apply the Knowledge of basic medical sciences relevant to the practice of Orthodontics.

PO2 : Diagnose the abnormal growth and development patterns of Dento-facial skeletal and soft tissue structures along with their etiology and pathophysiology.

PO3 : Discuss the dynamic interrelationship and reactions of biological process and mechanical forces acting in and around the stomatognathic system.

PO4 : Demonstrate the in-depth Knowledge of theories and types of tooth movement, methods of controlling the untoward effects and mechanical aspects of Orthodontic tooth movement.

PO5 : Recognize the etiological factors for the development of malocclusion and be able to classify the various types of malocclusions and related disorders affecting the craniofacial region.

PO6 : Display the effective use of appropriate diagnostic aids in Clinical Orthodontics.

PO7 : Employ critical thinking and understanding of the principles of clinical management of various types of moderate to complex Dento-facial disorders requiring Orthodontic treatment.

PO8 : Develop skills for systematic preparation and maintenance of case records in both manual and digital forms.

PO9 : Demonstrate the skills for the diagnosis and develop a treatment plan for all types of malocclusions.

PO10: Demonstrate the application of recent advances in biomaterials, techniques and Technology.

PO11: Design , fabricate Orthodontic appliances and clinically carry out treatment including preventive, interceptive and corrective procedures for all types of malocclusions.

PO12: Display the skills for clinical management of medically compromised patients, adult patients and other cases requiring multi-disciplinary approach.

PO13: Demonstrate the clinical skills required to prevent the relapse of the Orthodontic treatment outcomes.

PO14: Demonstrate the ability to critically analyze and comment on structure and components of research papers.

Email: ssdctumkur@gmail.com

PO15: Plan, organize and conduct both clinical and basic research project with an aim of publishing /present the research outcome in various scientific forums.

PO16: Demonstrate teaching skills and oral presentation skills with the use of Information & Communication Techniques.

PO17: Demonstrate the techniques of disease prevention, public awareness, infection control and provision of health care in the community.

PO18: Identify any newly encountered clinical situation and exhibit the ability to integrate the prior Knowledge to synthesize an appropriate treatment plan for effective management of these novel clinical conditions.

PO19: Develop skills to practice independently in terms of academic, clinical and research contexts.

PO20: Recognize and respect the patients' rights, moral and ethical responsibilities, medico-legal aspects involved in the Oral health care delivery of the individual patient as well as the population.

PO21: Accept the apprehension and psychological status of the patient and parents and demonstrate the techniques of motivation and instill positive behavior towards the treatment.

PO22: Develop a high degree of credibility, integrity and professional honesty with social concern.

PO23: Develop skills for effective communication with patients, explaining them the various treatment options, the complications involved with different types of Orthodontic procedures and be able to obtain written informed consent for the same.

Postgraduate Course Outcomes (COs)

Course outcome (PG)- The training program in Orthodontics is to structure and achieve the dynamic interaction of biologic processes and mechanical forces acting on Stomatognathic system during Orthodontic treatment and Etiology, pathophysiology, diagnosis and treatment planning of various common Orthodontic problems.

Course outcome 1: (ORTCO1)

Should have adequate knowledge about the current principles and practice of contemporary dentistry.

Course outcome 2: (ORTCO2)

Should have adequate knowledge about current principles of growth and development

Course outcome 3: (ORTCO3)

Should have the knowledge about differentiating normal occlusion and malocclusion

Course outcome 4: (ORTCO4)

Should have an adequate knowledge about etiology of malocclusion i.e, General and local factors

Course outcome 5: (ORTCO5)

Should have adequate knowledge about differentiating skeletal and dental malocclusions

Course outcome 6: (ORTCO6)

Should be able to record a detailed case history and perform clinical examination of patients to arrive at a provisional diagnosis.

Course outcome 7: (ORTCO7)

Should have adequate knowledge about diagnosis and management of growing and non-growing skeletal malocclusions and recent diagnostic aids.

Course outcome 8: (ORTCO8)

SRI SIDDHARTHA DENTAL COLLEGE AND HOSPITAL

AGALAKOTE, B.H.ROAD, TUMKUR-572107, KARNATAKA.

Email: ssdctumkur@gmail.com

Should have adequate knowledge about direction of tooth movement and biomechanical principles of tooth and jaw movements.

Course outcome 9: (ORTCO9)

Should have adequate knowledge about influence of different drugs and chemicals on the biological response of tooth movement.

Course outcome 10: (ORTCO10)

Should have adequate knowledge about preparation of anchorage including dental and skeletal anchorage system.

Course outcome 11: (ORTCO11)

Should have adequate knowledge about preventive, interceptive, corrective and surgical orthodontics.

Course outcome 12: (ORTCO12)

Should have adequate knowledge about functional jaw orthopedics.

Course outcome 13: (ORTCO13)

Should have adequate knowledge about orthopedic and orthodontic appliances (removable and fixed mechanotherapy)

Course outcome 14: (ORTCO14)

Should have adequate knowledge about advanced treatment methods including self ligating bracket system and aligners.

Course outcome 15: (ORTCO15)

Should have adequate knowledge about management of different types of skeletal and dental malocclusions.

Course outcome 16: (ORTCO16)

Should have adequate knowledge about management of different types of cleft lip and palate, adult orthodontics and other interdisciplinary orthodontics.

Email: ssdctumkur@gmail.com

Course outcome 17: (ORTCO17)

Should have adequate knowledge about planning, organizing and conduct both clinical and basic research project with an aim of publishing /present the research outcome in various scientific forums.

Course outcome 18: (ORTCO17)

Should have adequate knowledge about genetics in Orthodontics.

Course outcome 19: (ORTCO19)

Should have adequate knowledge about Adult Orthodontics.

Course outcome 20: (ORTCO20)

Should have complete knowledge about comprehensive retention protocols and followup plan.

Post Graduate program outcome

After successful completion of MDS program in department of Oral and MaxilloFacial surgery the postgraduate should be capable to

PO1: Demonstrate knowledge and understanding of aetiology, pathophysiology and diagnosis, appropriate treatment planning of various oral and maxillofacial surgical problems

PO2: Apply general surgical principles to pre- and post-surgical management particularly evaluation, post-surgical care, fluids and electrolyte management, blood transfusion and post-surgical pain, management.

PO3: Demonstrate knowledge of basic sciences relevant to the practice of oral and maxillofacial surgery

PSO4: Record clinical history, perform a methodical examination of the patient, order essential diagnostic investigation and interpret them and deduce reasonable diagnosis and formulate treatment plan of the surgical condition.

PO5: Formulate an evidence-based and cost-effective treatment plan in collaboration with the patient

PO6: Practise with competence minor oral surgical procedures and common maxillofacial surgery both surgically and medically (if required multispecialty approach)

PO7: Provide apt diagnosis, surgical and medical management of diseases, injuries and defects of human jaws and associated oral structure by interaction with other dental, medical and allied disciplines.

PO8: Practise personal hygiene and infection control, prevention of cross infection and safe disposal of hospital waste keeping in view of the high prevalence of hepatitis, HIV and other transmissible diseases

PO9: Develop an attitude to seek an opinion from allied medical and dental specialists as and when required and be willing to share knowledge and clinical experience with professional colleagues

PO10: Adopt new techniques of surgical management developed from time to time-based on own research or critical appraisal of research literature which are in the best interest of the patient

Postgraduate Course Outcomes (COs)

CO1: Should have adequate knowledge about the current principles and practice of contemporary Oral and MaxilloFacial Surgery.

CO 2: Should be able to record a detailed case history and perform clinical examination of patients to arrive at a provisional diagnosis.

CO 3: Student should be able to interpret the plain radiograph (IOPA, extra oral radiograph) and advanced imaging technology CT, CBCT and MRI to facilitate diagnosis and treatment planning

CO4: Student should be able to identify surgical instruments for minor and major Oral and MaxilloFacial surgical procedures

CO5: Student should be able to select the appropriate type of anesthetic agents and able to manage patients accordingly,

CO 6: Should be able to perform various types of preclinical exercises like different suturing techniques and dental wiring on models and perform the same on patients.

CO6: Student should be able to perform Minor Surgical procedures and manage complications

CO7: Student will be able to perform minor surgical procedures for special children and medically compromised patients

CO8: Student will be able to discuss about the various advanced oral and maxillofacial surgical procedures and prepare and assist for the same.

CO9: Student should be able to display effective interpersonal communication and managerial skills on patient care

CO 10: Student should have adequate knowledge about basic medical sciences and should have attended peripheral clinical postings.

CO 11: Student should be able to display their knowledge through seminars, Journal Clubs, Case presentations, Problem Based learnings and Inter Departmental Meet.

CO 12: Students should be able to take minimum two theory classes per annum for undergraduate students.

DEPARTMENT OF ORAL PATHOLOGY & MICROBIOLOGY

MDS Oral Pathology and Microbiology

COURSE OUTCOMES

At the end of the course, graduates will be able to...

- CO1: demonstrate basic knowledge of general
- CO2: demonstrate basic knowledge of oral pathology in dealing with the nature of oral diseases, their causes, processes and effects.
- CO3: Perform routine laboratory techniques for histopathological evaluation of specimens relating to oral and perioral tissues
- CO4: Plan and administer the routine hematological, cytological, microbiological, immunological and ultrastructural investigations.
- CO5: Demonstrate the knowledge of current research methodology, collection and interpretation of data, ability to carry out research projects on clinical and or epidemiological aspects.
- CO6: Write scientific papers and Update knowledge on current databases, automated data retrieval systems and referencing.
- CO7: Demonstrate the scientific knowledge pertaining to the field and present it in conferences both as poster and verbal presentations and take part in group discussions.
- CO8: Recognize the pathology of oral tissues as well as the relation of local pathologic and clinical findings to systemic conditions.
- CO9: Apply basic oral microbiology and their relationship to various branches of dentistry affecting hard and soft tissues.
- CO10: Describe the basics in Forensic Odontology and ability to apply it in medicolegal issues.
- CO11: Demonstrate and practice integrity, responsibility, respect and selflessness.
- CO12: Examine and interpret gross tissue specimens.
- CO13: Interpret pathologic cellular change microscopically and group diseases of similar histologic patterns in order to arrive at a differential diagnosis and ultimately to a final diagnosis.

MASTER OF DENTAL SURGERY (MDS)PERIODONTICS AND ORAL IMPLANTOLOGY

PROGRAM OUTCOMES

At the end of the program, graduates will be able to...

PO1: Describe the biology and pathology of the periodontium as well as the principles of bone biology and wound healing.

PO2: Collect, organize, analyze, interpret and present clinical data related to the examination of periodontal tissues and for implant placement

PO3: Utilize the appropriate diagnosing techniques relevant to periodontal and implant treatment and establish a prognosis for the outcomes of periodontal and implant treatments.

PO4: Demonstrate competence in non-surgical and surgical management of periodontal defects, regenerative techniques, mucogingival procedures for normal and medically compromised patients. Also for managing medical emergencies in the dental clinic.

PO5: Perform restoration driven implant placement based on the pre-operative planning. And, perform augmentation procedures prior to implant placement by using the appropriate material and techniques.

PO6: Communicate effectively with other disciplines in treatment planning and in treatment sequencing.

PO7: Teach in both didactic and clinical areas of undergraduate. Conduct, present and publish research projects based on national and global needs.

PAPER-1

COURSE OUTCOMES:

Part-1

1. Should have a broad overview of the current research and methods used in studying problems in periodontal disease.
2. Should have an understanding of the broad range of infection diseases affecting the oral cavity.
3. Should have an understanding the clinical and biological factors to be considered in the appropriate use of antimicrobial drugs
4. Be aware of the contemporary principles and practices of laboratory diagnostic techniques and interpretation of laboratory reports.
5. Should have an understanding of hospital acquired infections and infections in the compromised host
6. Should have a basic knowledge on research methodology, biostatistics and be able to apply it in various research projects as well as dissertations.
