DEPARTMENT OF PUBLIC HEALTH DENTISTRY 2022 JAN EXAM GOING BATCH II THEORY IMPROVEMENT INTERNAL ASSESSMENT MARKS Assessment for slow learners

Students who had scored less than 50% in internal assessment were asked to meet head of the department. Then students were asked about the problems which they are facing in understanding and writing the paper. Test for improvement was conducted and evaluation was done. The identified slow learners showed improvement.

List of slow learners according our observation and results of internal assessment and improvement test results:

Sl. No	Name of the students	Int-Marks Max. Marks 70	Improvement exam marks- 70
1	Adrish Choudary	28	46
2	Alex	35	47
3	Sushma	17	39
4	adarsh	AB	36

2022JAN EXAM GOING BATCH

II THEORY IMPROVEMENT INTERNAL ASSESSMENT MARKS

Assessment for slow learners

Students who had scored less than 50% in internal assessment were asked to meet head of the department. Then students were asked about the problems which they are facing in understanding and writing the paper. Test for improvement was conducted and evaluation was done. The identified slow learners showed improvement.

List of slow learners according our observation and results of internal assessment and improvement test results:

Sl. No	Name of the students	Int-Marks Max. Marks 70	Improvement exam marks- 70

SRI SIDDHARTHA DENTAL COLLEGE AND HOSPITAL, TUMKUR DEPARTMENT OF PUBLIC HEALTH DENTISTRY 2020 JAN EXAM GOING BATCH I THEORY IMPROVEMENT INTERNAL ASSESSMENT MARKS Assessment for slow learners

Students who had scored less than 50% in internal assessment were asked to meet head of the department. Then students were asked about the problems which they are facing in understanding and writing the paper. Test for improvement was conducted and evaluation was done. The identified slow learners showed improvement.

List of slow learners according our observation and results of internal assessment and improvement test results:

Sl. No	Name of the students	Int-Marks Max. Marks 70	Improvement exam marks- 70
1	Akshay Subhash	4	4
2	Benzeer T Rapsang	10	15
3	Laveena	5	15
4	N Maneesha	20	24
5	Taza tony	3	13
6	Victoria Keisham	7	7
7	Moirangmayum Geethadevi	10	15
8	Donkupal Lapang	Ab	Ab
9	Sankaran NVV	Ab	Ab
10	Christopher L	Ab	Ab

Miss. Laya Shree

Final Yr BDS

Sri Siddhartha Dental College and Hospital, Tumkur

Through,

The Principal,

Sri Siddhartha Dental College and Hospital,

Sri Siddhartha Academy of Higher Education, Tumkur

To,

The Secretary

Indian Association of Public Health Dentistry.

Respected sir,

Subject: Submission of essay for National level Essay Competition 2022

As per the subject cited above, I **Miss. Laya Shree**, Studying in Final Yr BDS in **Sri Siddhartha Dental College and Hospital, Tumkur** would like to submit my essay on "**Prevention of oral disease to promote good oral health**" for National level Essay Competition 2022 organized by **IAPHD**. Kindly consider and do the needful.

Letter is attached with Essay (pdf document)

Details:

Name of the student: **Miss. Laya Shree, Final Yr; 18SD1020**

email and mobile number: **layashree95@gmail.com ; 8360569297**

Name of the college : **Sri Siddhartha Dental College and Hospital, Sri Siddhartha Academy of Higher Education, Tumkur**

Address of the college : **Agalakote, BH Road Tumkur-572107**

Thanking you,

Yours Sincerely

Subject: Regarding unavailability of drinking water in
examination hall.

Respected Mam,

We the third year students of BDS had appeared
for internal examination would like to bring to your notice
that there was unavailability of drinking water during
examination. So, we kindly request you to look into it

Thanking you

Your's obediently.

HOBBY PROJECTS

2017-18

1. Arduino Based Fire Fighting Robot:

Many deaths have been caused because of fire accidents in India all over the world. Even though there are lot of precautions taken for Fire accidents. In the event of a fire breakout, to rescue people and to put out the fire we are forced to use human resources which are not safe. With the advancement of technology especially in Robotics it is very much possible to replace humans with robots for fighting the fire. This would improve the efficiency of fire fighters and would also prevent them from risking human lives. This project is a Fire Fighting Robot using Arduino, which will automatically sense the fire and start the water pump

Students of 3rd sem ISE :

Meenakshi M
Padmini A
Prathima T
Prachi Shristi

Observation:

These students belong to 2nd year, who have some basic knowledge about electronics, ARM processor LPC2148 and small amount of programming language. They have taken interest and studied Arduino UNO board, working of Servo Motor((SG90), L293D motor Driver module and prepared chassis with motors. This was like a self-study to these young minds.

2. Voice Controlled LEDs Using Bluetooth And Arduino:

Controlling LEDs with voice command seems to be a difficult task. This is done with an Arduino UNO to serially communicate with HC-06 Bluetooth module and a smartphone to send voice command to Bluetooth module HC-06. For receiving voice command are done using "Arduino Bluetooth Voice Controller" android app which you can download from play store.

Students of 3rd sem ISE :

Mohammed Khizer Khan
Mohammed Asif Pasha
Nithin K V
Chethan Gowda

Observation:

These students belong to 2nd year who have some basic knowledge about electronics, ARM processor LPC2148 and small amount of programming language. Students with the motivation and their interest have studied the working of Arduino Board, LEDs, Arduino Bluetooth Voice Controller and HC-06 Bluetooth Module. Their enthusiasm made them feel great to go with innovative project.

Sushma M

Professor and Head
Dept. of Information Science & Engineering
Sri Siddhartha Institute of Technology
Maralur, TUMKUR - 572 105.

1. Smat Locking System:

Smart home automation system plays a major role which helps in reducing work by using some technologies. This work is to send a signal to door from a tablet or mobile devices by using bluetooth system. This allows the user to lock and unlock a door from inside or outside a house with a Bluetooth device available. The ideal purpose of the work is, if the door is not locked in first floor or in any other floor. The user from ground floor can open the door or unlock the door from mobile phone or laptop, which makes a person to reduce its energy or save time. The major components of the system are latest arduino board, Servo motor and a bluetooth module standard protocol for wireless communication.

Students of 3rd sem ISE :

Ranjitha K S
Rakshitha N
Supriya M
Monika N G
Anuradha

Observation:

These are 2nd year students studied little bit of basics of electronic components and basics of programming language. With the motivation from the teacher planned to this project. They studied working of new components present in the project.

2. Bluetooth controlled robotic car: This project represents android application based Bluetooth controlled robotic car. Here main motto of our project is to control the car with android application. Here mainly Arduino UNO (ATMEGA 328P) is used, Bluetooth module (HC-05). Interface the Bluetooth module with the system so that we can easily control the system by smart phone application. This project is more necessary to the modern society in context of spying and surveillance. The project aims in designing a Robot that can be operated using Android mobile phone. The controlling of the Robot is done wirelessly through Android smart phone using the Bluetooth feature present in it. Here in the project the Android smart phone is used as a remote control for operating the Robot. The controlling device of the whole system is a Microcontroller. Bluetooth module, DC motors are interfaced to the Microcontroller. The data received by the Bluetooth module from Android smart phone is fed as input to the controller. The controller acts accordingly on the DC motors of the Robot. In achieving the task the controller is loaded with a program written using Embedded 'C' language. Still there exists a requirement of a cost-effective automation system, which will be easy to implement. An example of such a cost effective project has been proposed here.

Students of 3rd sem ISE :

Varun
Prathik
Sanketh
Shashidhar
Santosh

Observation:

These are 2nd year students studied little bit of basics of electronic components and basics of programming language. With the motivation from the teacher planned to this project. They studied working of new components present in the project.

SI NO	Name of Student	Title of project	year	Remark
1	Meenakshi M (16IS035) Padmini A (16IS044) Prathima T (16IS053)	Reading Temperature and Humidity Data in Mobile	2018-2019	IoT is a field where the things senses data and control the external features automatically. In the project sensed data is uploaded into the cloud and can view the sensed data in smart phone or device. The temperature and Humidity values are sensed and control via smart phone. Several parameters has been taken as sensor value accuracy, security of cloud mobile app compatibility, Arduino setup and Wi-Fi credentials correctness.
2	Shashank Holla K (16IS075) Neha P Bhat (16IS041)	Mobile App Development Project	2019-2020	Designed an app called ECHO in Android Studio, which is a simple and easy to use Music player app. It sorts the music based on Name as well as based on date added. Supports nearly all music formats. The embedded equalizer in the app imparts easy user interface. We can control the equalizer using volume adjustments.
3	Nischal Ram T (16IS042)	Intents App	2019-2020	A simple easy to use app designed using open source code by using Android Studio. This app was created by building different interfaces and adding functionalities.
4	Harshitha S (16IS027) Kavyashree B K (16IS032)	Mini Project of IoT using ESP8266 NODEMCU and Cloud 1. Home automation using ledon – offUsing google assistance using adafruit. 2. Distance measurement using ultrasound sensor and nodemcu and arduino.	2018-2019	1. This project shows how to control ESP8266 based projects using voice commands and the Google Assistant. A simple LED on and off functions performed as the base. Like the same can control appliances and set alarms. 2. This project measures the distance using ultrasonic sensor and NODEMCU and Arduino, Blync app is used. And in both the project data has been uploaded into cloud.
