Talks on "Link Between Oral Health and Mental Health"

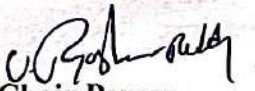

ARN: SSAHE261199

Educational talks highlighting the connection between oral health and mental well-being were delivered to students, faculty, and patients attending the OPD. The sessions emphasized how poor oral health can affect self-esteem, social interactions, and overall quality of life, while mental health conditions may influence oral hygiene practices. The importance of early intervention, stress management, and maintaining good oral hygiene habits was discussed. Participants were also encouraged to adopt a holistic approach to health, recognizing the interdependence of physical and mental well-being. The talks were interactive, allowing attendees to ask questions and share experiences, thereby enhancing engagement and understanding.

Resource persons for talks:

1. Dr. Suhas S, Professor Department of Oral Medicine
2. Dr. Jayadev S, Associate , Professor Department of Oral Medicine

Free Pit and Fissure Sealant Application Camp

ARN: SSAHE261199

The Department of Pedodontics conducted a **free pit and fissure sealant application camp** from **20th March to 20th April** to promote preventive dental care among children. Pediatric patients were screened, and eligible children received sealant application free of cost. Oral health education was also provided to children and their parents. Approximately 68 patients participated in the camp, benefiting from the preventive intervention. The initiative helped reduce the risk of dental caries and improve oral health.

RADIO TALK SIDDARTHA 90.8 FM

ARN: SSAHE261199

TOPIC: INFANT ORAL HEALTH

A radio talk on Infant Oral Health Awareness was delivered by Dr. Hemantha Krishna S to educate parents and caregivers about the importance of maintaining oral health from an early age on the occasion of World oral health month. The session highlighted that oral hygiene begins even before tooth eruption and discussed the causes and prevention of Early Childhood Caries, including improper feeding practices, frequent sugar exposure, and prolonged bottle feeding. Emphasis was placed on cleaning an infant's gums, initiating brushing with the eruption of the first tooth, and maintaining proper dietary habits.
