### REPORT OF RADIOTALK BY DEPARTMENT OF ORTHODONTICS AND DENTOFACIAL ORTHOPEDICS

A public awareness talk was conducted on 20<sup>th</sup> August 2025 on age considerations in treating a orthodontic case and various orthodontic treatment facilities available in Sri Siddhartha Dental College, Tumkur for growing and non growing adults by Dr. Chethan Kumar D, Reader, Dept of Orthodontics, Sri Siddhartha Dental College, constituent college of SSAHE, Tumkur, in Radio Siddhartha 90.8 FM.

**Department:** Orthodontics and Dentofacial Orthopedics

**Topic:** Age considerations in treating orthodontic cases.

**Date & Timings:** 20/08/2025 at 2.30pm

**Presenter:** Dr. Chethan Kumar D

#### **Brief Description:**

Age is a significant consideration in orthodontics because it influences the treatment plan, but it is never too late to receive treatment as long as teeth and gums are healthy. Early treatment (around ages 7-14) can take advantage of natural growth to guide jaw development and may lead to more options, while adult treatment is still highly successful but can be slower due to denser bone and is more limited in its ability to alter skeletal growth. Dr.Chethan Kumar D from department of Orthodontics gave information on the topic of interest. Talk was accompanied by Mrs. Shwetha (RJ), SSIT on 20/08/2025.
