

SRI SIDDHARTHA ACADEMY OF HIGHER EDUCATION TUMAKURU

(Deemed to be University, Accredited A⁺ Grade by NAAC, New Delhi.)

SRI SIDDHARTHA INSTITUTE OF TECHNOLOGY-TUMAKURU

(A constituent College of Sri Siddhartha Academy of Higher Education, Tumakuru.)

Department is Accredited by NBA

Syllabus for the Academic Year 2025-26

Vision

Mould quality technocrats in the field of Electronics and Communication with human values to cater the societal needs.

Mission

- To impart high-quality academic environment.
- To provide training in new tools and technologies.
- To facilitate continuous learning and research environment.
- To inculcate professionalism with ethical values, with little impact on environment.

Program Educational Objectives

PEO-1: Proficient to apply the knowledge gained in mathematics, science and engineering to the field of electronics and communication engineering for the synthesis and analysis of systems.

PEO-2: Competent to pursue higher studies and research, with effective communication.

PEO-3: Aware of new technologies in the domain field, apply the same for the societal requirement minimizing the impact on environment and ethical practices in their domain.

Knowledge and Attitude Profile (Washington Knowledge)

WK1: A systematic, theory-based understanding of the natural sciences applicable to the discipline and awareness of relevant social sciences.

WK2: Conceptually-based mathematics, numerical analysis, data analysis, statistics and formal aspects of computer and information science to support detailed analysis and modelling applicable to the discipline.

WK3: A systematic, theory-based formulation of engineering fundamentals required in the engineering discipline.

WK4: Engineering specialist knowledge that provides theoretical frameworks and bodies of knowledge for the accepted practice areas in the engineering discipline; much is at the forefront of the discipline.

WK5: Knowledge, including efficient resource use, environmental impacts, whole-life cost, reuse of resources, net zero carbon, and similar concepts, that supports engineering design and operations in a practice area.

WK6: Knowledge of engineering practice (technology) in the practice areas

Syllabus for the Academic Year 2025-26

in the engineering discipline.

WK7: Knowledge of the role of engineering in society and identified issues in engineering practice in the discipline, such as the professional responsibility of an engineer to public safety and sustainable development.

WK8: Engagement with selected knowledge in the current research literature of the discipline, awareness of the power of critical thinking and creative approaches to evaluate emerging issues.

WK9: Ethics, inclusive behaviour and conduct. Knowledge of professional ethics, responsibilities, and norms of engineering practice. Awareness of the need for diversity by reason of ethnicity, gender, age, physical ability etc., with mutual understanding and respect, and of inclusive attitudes.

Program Outcomes

Engineering Graduates will be able to:

PO1: Engineering Knowledge: Apply knowledge of mathematics, natural science computing, engineering fundamentals and an engineering specialization as specified in WK1 to WK4 respectively to develop to the solution of complex engineering problems.

PO2: Problem Analysis: Identify, formulate, review research literature and analyze complex engineering problems reaching substantiated conclusions with consideration for sustainable development. (WK1 to WK4)

PO3: Design/Development of Solutions: Design creative solutions for complex engineering problems and design/develop systems/components/processes to meet identified needs with consideration for the public health and safety, whole-life cost, net zero carbon, culture, society and environment as required. (WK5)

PO4: Conduct Investigations of Complex Problems: Conduct investigations of complex engineering problems using research-based knowledge including design of experiments, modelling, analysis & interpretation of data to provide valid conclusions. (WK8).

PO5: Engineering Tool Usage: Create, select and apply appropriate techniques, resources and modern engineering & IT tools, including prediction and modelling recognizing their limitations to solve complex engineering problems. (WK2 and WK6)

PO6: The Engineer and The World: Analyze and evaluate societal and environmental aspects while solving complex engineering problems for its impact on sustainability with reference to economy, health, safety, legal framework, culture and environment. (WK1, WK5 and WK7).

SRI SIDDHARTHA ACADEMY OF HIGHER EDUCATION TUMAKURU

(Deemed to be University, Accredited A⁺ Grade by NAAC, New Delhi.)

SRI SIDDHARTHA INSTITUTE OF TECHNOLOGY-TUMAKURU

(A constituent College of Sri Siddhartha Academy of Higher Education, Tumakuru.)

Department is Accredited by NBA

Syllabus for the Academic Year 2025-26

PO7: Ethics: Apply ethical principles and commit to professional ethics, human values, diversity and inclusion; adhere to national & international laws. (WK9)

PO8: Individual and Collaborative Team work: Function effectively as an individual, and as a member or leader in diverse/multi-disciplinary teams.

PO9: Communication: Communicate effectively and inclusively within the engineering community and society at large, such as being able to comprehend and write effective reports and design documentation, make effective presentations considering cultural, language, and learning differences

PO10: Project Management and Finance: Apply knowledge and understanding of engineering management principles and economic decision-making and apply these to one's own work, as a member and leader in a team, and to manage projects and in multidisciplinary environments.

PO11: Life-Long Learning: Recognize the need for, and have the preparation and ability for i) independent and life-long learning ii) adaptability to new and emerging technologies and iii) critical thinking in the broadest context of technological change. (WK8)

Program Specific Outcomes (PSOs)

PSO1: The ability to identify, analyse and design systems related to modern engineering hardware and software tools, in Electronics and Communication Engineering in the areas of electronics, communication, image processing, VLSI, signal processing and embedded systems for solving day to day problems.

PSO2: Impart the awareness about the impact of professional engineering solutions in societal and environmental context, professional ethics and be able to communicate effectively.

Syllabus for the Academic Year 2025-26

5th Semester B.E.

Academic year 2025-26

22EC5PE44	Real Time Operating Systems		

Syllabus for the Academic Year 2025-26

Department: Electronics and Communication Engineering			Semester: 5
Subject: Embedded System Design			
Subject Code:	22EC501	L – T – P – S:	42-0-0-48 (In Hrs)
		Credits:	3

Sl. No.	Course Objectives
1	Understand the fundamentals of embedded systems and their design constraints.
2	Explore different types of processor and memory technologies used in embedded systems.
3	Analyze communication protocols and interfacing techniques for embedded applications
4	Interpret the role of RTOS and software architectures in real-time embedded systems.

Module	Description	Hrs
I	Introduction: Overview of embedded systems, embedded system design challenges, common design metrics and optimizing them, Processor Technology, Design Technology, IC Technology. (Text 1: 1.1 to 1.5)	8
II	General-purpose processors: Basic Architecture, Operation, Programmer's View, Development Environment, ASIPS. Single-purpose processors: Standard Single-Purpose Peripherals, Timers, Counters, UART, PWM, LCD Controllers, Keypad controllers, Stepper Motor Controller, A to D Converters. (Text 1: 3.1 to 3.6, 4.1 to 4.8)	9
III	Memory: Introduction, Common Memory Types, Composing Memory, Memory Hierarchy and Cache, Cache replacement Policies. Interfacing: Communication Basics, Multilevel Bus Architectures, Advanced Communication Principles. Serial Protocols: I2C, CAN, FireWire, USB. Parallel Protocols: PCI Bus, ARM Bus Wireless Protocols: IrDA, Bluetooth, IEEE 802.11. (Text 1: 5.1 to 5.5, Text 1: 6.1 to 6.2, 6.7 to 6.11)	9
IV	Interrupts: Basics: Shared Data Problem, Interrupt latency, Survey of Software Architectures: Round Robin, Round Robin with Interrupts, Function Queues scheduling RTOS architecture. (Text 2: 4.1 to 4.4, 5.1 to 5.4)	8
V	Introduction to RTOS: Task- states, Semaphores and shared data. More operating systems services - Message Queues, Mail Boxes, Pipes, Timers, Events. (Text 2: 6.1 to 6.3, 7.1 to 7.3)	8

SRI SIDDHARTHA ACADEMY OF HIGHER EDUCATION TUMAKURU
(Deemed to be University, Accredited A⁺ Grade by NAAC, New Delhi.)
SRI SIDDHARTHA INSTITUTE OF TECHNOLOGY-TUMAKURU
(A constituent College of Sri Siddhartha Academy of Higher Education, Tumakuru.)
Department is Accredited by NBA
Syllabus for the Academic Year 2025-26

Text Books:

Sl. No.	Text Book title	Author	Volume and Year of Edition
1	Embedded System Design: A Unified Hardware/Software Introduction	Frank Vahid	Pearson Education, Second Edition, 2014 ISBN:9971- 51-405-2 2002
2	An Embedded software Primer	David E. Simon	CISCO Press, 2017. ISBN:81-7758-154-6 2006

Reference Books:

Sl. No.	Text Book title	Author	Volume and Year of Edition
1	Embedded Systems: Architecture and Programming	Raj Kamal	TMH. 2008 Education Asia / PHI Indian Reprint 2002
2	Introduction to Embedded Systems	Shibu K.V	McGraw-Hill Education(INDIA) Private limited, 2012
3	Embedded Systems: A Contemporary Design Tool	James K	John Wiley India Pvt. Ltd 2014

Course Outcomes:

Course outcome	Descriptions
CO1	Define the design metrics, processor, and IC technologies used in embedded system design.(L1)
CO2	Analyze the Differences between general-purpose and single-purpose processors and their applications in embedded systems.(L3)
CO3	Classify and compare different memory types and communication protocols used for interfacing in embedded systems.(L2)
CO4	Illustrate interrupt handling techniques and evaluate various embedded software architectures.(L2)
CO5	Design and implement RTOS-based embedded solutions using semaphores, message queues, and events.(L3)

Syllabus for the Academic Year 2025-26

Department: Electronics and Communication Engineering			Semester: 5
Subject: Digital Signal Processing			
Subject Code:	22EC502	L – T – P – S:	42-0-28-50 (In Hrs)
		Credits:	4

Sl. No.	Course Objectives
1	Summarize the basics of digital signal processing.
2	Utilize the FFT Algorithms for efficient DFT computation.
3	Illustrate the concepts of analog and digital filter design and its structures.
4	Explain the architecture and instruction set of TMS32067xx processor.

Module	Description	Hrs
I	Frequency Domain Sampling: Introduction, Frequency domain sampling and reconstruction of discrete time signals, Discrete Fourier Transform (DFT): Discrete Fourier Transform, DFT as a linear transformation, Relationship of DFT to other transforms, Properties of DFT (without derivation). (Text 1: 7.1, 7.2)	9
II	Linear Filtering: Introduction, Use of DFT in linear filtering, Filtering long data sequences: overlap-save, overlap-add method Fast Fourier Transform (FFT) algorithms: Direct computation of DFT, Radix-2 FFT algorithm: Decimation-in-time algorithm, Decimation-in-frequency algorithm (without derivation). (Text 1: 7.3.1, 7.3.2, 8.1.1 to 8.1.3)	9
III	FIR Filters and its applications: Introduction, Design of FIR filters: Symmetric and antisymmetric FIR filters, Design of linear phase FIR filters using windows and frequency sampling methods, FIR differentiators, Structures for FIR Systems: Direct form structures, cascade form structures and linear phase structures. (Text 1: 10.2.1, 10.2.2 to 10.2.3, 10.2.5, 10.2.6, 9.2.1 and 9.2.2)	8
IV	IIR Filters: Introduction, Analog filter specifications, Classification of analog filters: Butterworth and Chebyshev approximations, Frequency transformations, Design of analog filters. Digital IIR filter design using impulse invariant technique, Bilinear transformations. IIR filter structures: Direct form (I and II), Cascade, Parallel structures. (Text 1: 10.3.2, 10.3.3, 10.3.5, 9.3.1, 9.3.3, 9.3.4)	8
V	Architecture and Instruction set of TMS320C67x processor: Introduction, Architecture, Pipelining, Linear and circular addressing modes,	8

Syllabus for the Academic Year 2025-26

	Instruction sets, Assembler directives, Interrupts, Memory considerations, Fixed and floating-point formats, Implementation of FIR and IIR filters. (Text 2: 3.1 to 3.9.3, 3.14, 3.18, 4.7, 5.4)	
--	--	--

LAB CONTENT:

Sl. No.	Experiment Description
EXPERIMENTS USING MATLAB	
1	Compute N point DFT of a given sequence and to plot magnitude and phase spectrum and verification of its properties.
2	Compute the linear convolution and Circular convolution of two sequences using DFT and IDFT and plot the graphs.
3	Compute autocorrelation and cross correlation of a given sequence and verification of its properties and plot the graphs.
4	For a given difference equation, determine i) Impulse response ii) Step response iii) Steady state response iv) Steady state response with initial conditions and plot the graphs.
5	Design of FIR filter for given specifications and plot the magnitude and phase response.
6	Design of IIR filter for given specifications and plot the magnitude and phase response.
7	Application of FIR filters: Design of Differentiator.
EXPERIMENTS USING DSP PROCESSOR (C program)	
8	Compute the Linear convolution and Circular convolution of two given sequences.
9	Computation of N- Point DFT of a given sequence.
10	Compute the Impulse response of first order and second order system.

Text Books:

Sl. No.	Text Book title	Author	Volume and Year of Edition
1	Digital Signal Processing: Principles, Algorithms and Applications	J. G. Proakis, D. G. Manolakis	Pearson Education Asia/Prentice Hall of India, 4 th Edition, 2014

Department: Electronics and Communication Engineering			Semester: 5
Subject: Principles of CMOS VLSI Design			
Subject Code:	22EC503	L – T – P – S:	42-0-28-50 (In Hrs)
		Credits:	4

Sl. No.	Course Objectives
1	Understand the VLSI design flow, MOSFET switching behavior, CMOS logic gates, and circuit representation using stick diagrams and transmission gates.
2	Describe MOS transistor characteristics, CMOS inverter behavior, and explain fabrication concepts with lambda-based design rules in layout design.
3	Interpret circuit parameters including resistance, capacitance, delay, and switching characteristics in CMOS circuits.
4	Explain CMOS subsystems and memory elements, and discuss the impact of scaling models on device performance.

Module	Description	Hrs
I	Overview of VLSI: Introduction, VLSI Design Flow, Ideal Switches and Boolean operations, MOSFET as switches, FET Threshold voltage concepts, Pass Transistors and characteristics, CMOS Logic - Basic gates and Compound gates, MOS layers, Layout and Stick diagrams of simple logic gates, Transmission Gate Circuits. (Text 1: 1.1, 2.1, 2.2, 2.3, 2.4, 2.5. Text Book 2: 3.1,3.2,3.7)	10
II	MOS Transistor theory: Introduction, I-V Characteristics, DC analysis of CMOS Inverter. Fabrication: nMOS fabrication, CMOS fabrication. Lambda-based design rules. (Text 1: 7.1, Text Book 2: 1.7, 1.8, 2.1.1,2.1.2, 3.3.1)	8
III	Basic Circuit Concepts: Sheet resistance, Area capacitances, Capacitance calculations. Delay unit, Inverter delays, Switching Characteristics, Rise Time and Fall Time Calculations, Propagation delay. (Text 2: 4.1,4.3,4.4,4.5,4.6, Text Book 1: 7.2.1,7.2.2, 7.2.3)	8
IV	CMOS Subsystem Design and Process: Architectural issues, Switch logic, Gate logic-NMOS and BiCMOS of Inverter, NAND and NOR, ALU subsystem Design-Datapath of a processor, Standard Adder Element Design, Implementation of 4-bit Adder and ALU. (Text 2: 6.1, 6.2, 6.3.1,6.3.2,6.3.3, 8.2, 8.3)	8
V	Memory elements: Static RAM-General SRAM cell, 6T and 4T SRAM Models, Multiport SRAM, SRAM Arrays, DRAM- 1T DRAM cell, Write and

Syllabus for the Academic Year 2025-26

	Read Operations. Scaling of MOS Circuits: Constant Voltage, Constant field, Combined Voltage and Dimension Scaling Models, Scaling factors for Device Parameters. (Text 1: 13.1,13.2,13.3, Text Book 2: 5.1, 5.2)	8
--	---	----------

LAB CONTENT:

Sl. No.		Experiment Description
1	a	Draw a CMOS circuit of inverter using schematic and draw the layout for the same using a specified technology.
	b	Draw a CMOS circuit of buffer using schematic and draw the layout for the same using a specified technology.
2	a	Realize a two input NAND gate using CMOS logic and verify its truth table in both schematic and layout for specified technology.
	b	Realize a two input NOR gate using CMOS logic and verify its truth table in both schematic and the layout for specified technology.
3	a	Implement a two input XOR gate with minimum number of transistors and verify its timing diagram in both schematic and layout.
	b	Implement a two input XOR gate using TG and verify its timing diagram in both schematic and layout.
4	a	Implement a full adder circuit with minimum length and width and verify its timing diagram. Make a Verilog file of the schematic and generate the layout. Verify the timing diagram in the layout.
	b	Implement a 4-bit parallel adder circuit with minimum length and width and verify its timing diagram. Make a Verilog file of the schematic and generate the layout. Verify the timing diagram in the layout.
5		Implement a 4:1 Multiplexer using Transmission Gate (TG). Verify the truth table in the schematic editor. Make a verilog file of the schematic and generate the layout. Show the 2D and 3D view for the layout.
6	a	Implement a SR flip flop with Clock, Preset and Clear. Make a verilog file of the schematic and generate the layout. Verify its timing diagram in both schematic and layout. Show the 3D and 2D view for the layout.
	b	Implement D flip flop with Clock, Preset and Clear. Make a verilog file of the schematic and generate the layout. Verify its timing diagram in both schematic and layout.
7	a	Implement a JK flip flop with Clock, Preset and Clear. Make a verilog file of the schematic and generate the layout. Verify its timing diagram in both schematic and layout.
	b	Implement a T flip flop with Clock, Preset and Clear. Make a verilog file of the schematic and generate the layout. Verify its timing diagram in both schematic

Syllabus for the Academic Year 2025-26

	and layout.
8	Implement a serial register capable of holding and shifting 4 bit words. Make a verilog file of the schematic and generate the layout. Verify its timing diagram in both schematic and layout. Show the 3D and 2D view for the layout.
9	Implement a serial adder circuit with minimum length and width and verify its timing diagram. Make verilog file of the schematic and generate the layout. Verify the timing diagram in the layout.
10	Design a 4-bit Asynchronous Counter using D flip flop in schematic editor. Make a verilog file of the schematic and generate the layout. Verify the timing diagram in the schematic and layout.

Text Books:

Sl. No.	Text Book title	Author	Volume and Year of Edition

Department: Electronics and Communication Engineering			Semester: 5
Subject: Digital Image Processing and Computer Vision			
Subject Code:	22EC5PE41	L – T – P – S:	42-0-0-48 (In Hrs)
		Credits:	3

Sl. No.	Course Objectives
1	Introduce the concepts of image processing and basic analytical methods in image processing.
2	Explore image enhancement techniques in spatial and frequency domains.
3	Understand image transformation techniques for the image analysis.
4	Make use of feature extraction techniques for object detection applications.

Module	Description	Hrs
I	Digital image fundamentals: Introduction, Digital Image Processing definition, fundamental steps in digital image processing, classification of digital images, image file formats, Applications of Digital Image Processing, Convolution and Correlation: 2D convolution through graphical method, convolution through Z transform, circular convolution, correlation through matrix analysis. (Text 1: 1.1 to 1.4, Text2: 1.9 to 1.10, 3.1 to 3.7)	9
II	Elements of visual perception: Introduction, Structure of human eye, Image formation in an eye, Brightness adaptation and discrimination, Light and Electromagnetic spectrum, Image sensing and acquisition, Image sampling and quantization, Some basic Relationship between pixels: Neighbors of a pixel, Adjacency, connectivity, regions, and Boundaries, Distance Measures. (Text 1: 2.1 to 2.5)	8
III	Image transforms: Introduction, Two dimensional orthogonal and Unitary transforms, Properties of Unitary transforms, two-dimensional discrete Fourier Transform, Discrete Cosine Transforms, Sine Transforms, Hadamard Transform, Haar Transform. (Text 2: 4.1 to 4.12)	8
	Intensity transformations and spatial filtering: Introduction, Image Negative, Log transformation, Power Law(gamma transformation), Piecewise-linear transformation functions, Histogram Processing: Histogram Equalization, Histogram Matching, Linear gray level	

Syllabus for the Academic Year 2025-26

IV	transformation, local or neighborhood operation, Median filter, Spatial domain high pass filtering or Image Sharpening, Bit plane slicing, Image enhancement in the frequency domain, Homomorphic filter, zooming operation, Image Arithmetic. (Text 1:3.1 to 3.4, Text2: 5.1 to 5.15)	9
V	Image segmentation and feature extraction: Introduction, Point, Line, and Edge Detection, Thresholding, Segmentation by Region Growing and by Region Splitting and Merging, Boundary Preprocessing, Boundary Feature Descriptors, Region Feature Descriptors, Principal Components as Feature Descriptors. (Text 1: 10.1 to 10.4, 11.1 to 11.5)	8

Text Books:

Sl. No.	Text Book title	Author	Volume and Year of Edition
1	Digital Image Processing	Rafael C. Gonzalez, Richard E. Woods	Pearson Education Pvt. Ltd, 4 th edition 2018.

Reference Books:

Sl. No.	Text Book title	Author	Volume and Year of Edition
1	Fundamentals of Digital Image Processing	Anil Jain K	PHI Learning Pvt. Ltd., 2011
2	Digital Image Processing	William K. Pratt	John Wiley, 4th Edition, 2007

Course Outcomes:

Course outcome	Descriptions
CO1	Show mathematical representation of various types of images and image processing systems.(L1)
CO2	Interpret the various image enhancement techniques in spatial domain and frequency domain. (L2)
CO3	Choose various Image transformation Techniques to analyze digital images. (L3)
CO4	Apply segmentation and feature extraction techniques on images to extract the region of interest. (L3)
CO5	Analyze computer vision algorithms for feature extraction, image segmentation, and object recognition. (L4)

SRI SIDDHARTHA ACADEMY OF HIGHER EDUCATION TUMAKURU
(Deemed to be University, Accredited A⁺ Grade by NAAC, New Delhi.)
SRI SIDDHARTHA INSTITUTE OF TECHNOLOGY-TUMAKURU
(A constituent College of Sri Siddhartha Academy of Higher Education, Tumakuru.)
Department is Accredited by NBA
Syllabus for the Academic Year 2025-26

Department: Electronics and Communication Engineering			Semester: 5
Subject: Robotics and Automation			
Subject Code:	22EC5PE42	L – T – P – S:	42-0-0-48 (In Hrs)
		Credits:	3

Sl. No.	Course Objectives
1	Introduce the fundamental concepts in robotics.
2	Learn the concepts of kinematics.
3	Understand the coordinate transformation, trajectory planning and control techniques.
4	Study the sensors and devices in robot applications and vision analysis.

Module	Description	Hrs
I	Basic concepts of robotics: Introduction, Evolution of robots and robotics, Laws of Robot, Robot definition, Generations of Robots, Robot anatomy, Coordinate frames, mapping and transforms. (Text 1: 1.1 to 1.6, 2.1 to 2.5)	8
II	End effectors: Introduction, Grippers – Mechanical Grippers, Pneumatic and Hydraulic Grippers, Magnetic Grippers, Vacuum Grippers; Two Fingered and Three Fingered Grippers; Internal Grippers and External Grippers; Selection and Design Consideration. (Text 2: 5.1 to 5.4)	9
III	Kinematics: Introduction, Direct kinematic model: Mechanical structure and notations, Description of joints and links. Kinematic modeling of the manipulator. Denavit –Hartenberg Notation. ROBO Software implementation of kinematic models. (Text 1: 3.1 to 3.4)	9
IV	Path planning: Introduction, Trajectory planning, Trajectory planning problem, terminology, steps in trajectory planning, classification of trajectory planning, types of trajectory function tasks, joint space techniques, Cartesian space technique. (Text 1: 7.1 to 7.8)	8
V	Robotic sensors and vision: Introduction, Sensors and Robotics, Kinds of sensors used in Robotics. Robotic Vision, Industrial applications of vision –controlled robotic vision systems. (Text 1: 9.1 to 9.5)	8

Text Books:

SRI SIDDHARTHA ACADEMY OF HIGHER EDUCATION TUMAKURU
(Deemed to be University, Accredited A⁺ Grade by NAAC, New Delhi.)
SRI SIDDHARTHA INSTITUTE OF TECHNOLOGY-TUMAKURU
(A constituent College of Sri Siddhartha Academy of Higher Education, Tumakuru.)
Department is Accredited by NBA
Syllabus for the Academic Year 2025-26

Sl. No.	Text Book title	Author	Volume and Year of Edition
1	Robotics And Control	R K Mittal And I J Nagarth	Mc Graw – Hill, 2003
2	Industrial Robotics – Technology, Programming and Applications	M.P.Groover	McGraw-Hill, 2001

Reference Books:

Sl. No.	Text Book title	Author	Volume and Year of Edition
1	Robotics Control, Sensing, Vision and Intelligence	Fu.K.S. Gonzalz.R.C., and Lee C.S.G.	Mc Graw – Hill, 1987
2	Robotic engineering- An Integrated Approach	Richard D. Klafter, Thomas A. Chmielewski and Michael Negin,	Prentice Hall Inc, 1989

Course Outcomes:

Course outcome	Descriptions
CO1	Outline the basics and the classifications of robotic systems.(L2)
CO2	Analyze the end effectors of robotics. (L2)
CO3	Develop and apply kinematic models using Denavit–Hartenberg notation and implement them using simulation software(L3)
CO4	Interpret the Kinematics and path planning for robotic systems. (L2)
CO5	Design sensors and robotics for industrial applications.(L3)

Course Articulation Matrix:

Department: Electronics and Communication Engineering			Semester:	5
Subject: Python Programming and Applications				
Subject Code:	22EC5PE43	L – T – P – S:	42-0-0-48	(In Hrs)
			Credits:	3

Sl. No.	Course Objectives
1	Understand the fundamentals of Python scripts.
2	Learn core Python scripting elements such as variables and flow control structures.
3	Study Python functions to facilitate code reuse.
4	Acquire the knowledge of numpy package and machine learning application of Python.

Module	Description	Hrs
I	Parts of Python Programming Language: Data Types, Indentation, Comments, Reading Input, Print Output, Type Conversions, The type() Function and Is Operator, Dynamic and Strongly Typed Language, Control Flow Statements , The if Decision Control Flow Statement, The if...else Decision Control Flow Statement, The if...elif...else Decision Control Statement, Nested if Statement, The while Loop, The for Loop, The continue and break Statements, Functions , Built-In Functions, Commonly Used Modules, Function Definition and Calling the Function, The return Statement and void Function, Scope and Lifetime of Variables. (Text 1: (2.7- 4.8))	9
II	Strings: Creating and Storing Strings, Basic String Operations, Accessing Characters in String by Index Number, String Slicing and Joining, String Methods, Formatting Strings, Lists , Creating Lists, Basic List Operations, Indexing and Slicing in Lists, Built-In Functions Used on Lists, List Methods, The del Statement. (Text 1: Chapter 5 and 6)	9
III	Dictionaries: Creating Dictionary, Accessing and Modifying key:value Pairs in Dictionaries, Built-In Functions Used on Dictionaries, Dictionary Methods, The del Statement, Tuples and Sets , Creating Tuples, Basic Tuple Operations, Indexing and Slicing in Tuples, Built-In Functions Used on Tuples, Relation between Tuples and Lists, Relation between Tuples and Dictionaries, Tuple Methods, Using zip() Function, Sets, Set Methods,	8

Syllabus for the Academic Year 2025-26

	Traversing of Sets. (Text 1: Chapter 7 and 8)	
IV	NumPy Basics: Arrays and Vectorized Computation: The NumPy ndarray: A Multidimensional Array Object: Creating ndarrays, Data Types for ndarrays, Arithmetic with NumPy Arrays, Basic Indexing and Slicing, Boolean Indexing, Fancy Indexing, Transposing Arrays and Swapping Axes, Universal Functions: Fast Element-Wise Array Functions, Array-Oriented Programming with Arrays: Expressing Conditional Logic as Array Operations, Mathematical and Statistical Methods, Methods for Boolean Arrays, Pseudorandom Number Generation. (Text 2: 4.1 – 4.6)	8
V	Applications of Python in Machine learning: Basics of machine learning, problems that machine learning can solve, task and data, Essential Libraries and tools- Jupyter notebook, numpy, scipy, matplotlib, pandas. (Text 3: 1.1 -1.5)	8

Text Books:

Sl. No.	Text Book title	Author	Volume and Year of Edition
1	Introduction to Python Programming	Gowri shankar S, Veena A	1 st Edition, CRC Press/Taylor & Francis, 2018. ISBN-13: 978-0815394372
2	Python for Data Analysis	Wes McKinney	2 nd Edition, O'Reilly Media, ISBN: 978-1-491-95766-0, 2018
3	Introduction to machine learning with python	Andreas C. Müller and Sarah Guido	1 st edition, O'Reilly Media, Inc, 2016, 978-1-449-36941-5

Reference Books:

Sl. No.	Text Book title	Author	Volume and Year of Edition

(Deemed to be University, Accredited A⁺ Grade by NAAC, New Delhi.)
SRI SIDDHARTHA INSTITUTE OF TECHNOLOGY-TUMAKURU
(A constituent College of Sri Siddhartha Academy of Higher Education, Tumakuru.)
Department is Accredited by NBA
Syllabus for the Academic Year 2025-26

Course Outcomes:

Course outcome	Descriptions
CO1	Interpret the core principles of Python, such as its object-oriented nature and dynamic typing, by explaining how they contribute to the language's readability and flexibility. (L2)
CO2	Demonstrate the creation of lists, tuples, and dictionaries, and illustrate various methods for adding, removing, and modifying elements within each data structure. (L2)
CO3	Implement Python programs to solve practical problems, such as sorting a list of numbers or counting word frequencies in a given text file. (L3)
CO4	Analyze the utility of Numpy Python package and its features. (L3)
CO5	Outline the machine learning applications using Python. (L2)

Course Articulation Matrix:

Department: Electronics and Communication Engineering			Semester: 5
Subject: Real Time Operating Systems			
Subject Code:	22EC5PE44	L – T – P – S:	42-0-0-48 (In Hrs)
		Credits:	3

Sl. No.	Course Objectives
1	Review the basics of real time system.
2	Study the RTOS Architecture.
3	Understand the concepts of Task Scheduling and context switching.
4	Learn the Real-Time System Development Tools

Module	Description	Hrs
I	Introduction to Real-Time Systems: Definitions and Characteristics of Real-Time Systems, Applications of Real-Time Systems, Basic Concepts of Real-Time Systems, Real-Time System Design Issues, Timing Constraints and Predictability. (Text 1: 1.1, 1.2)	8
II	Overview of RTOS Architectures: RTOS Architecture, RTOS Services, Static and Dynamic Scheduling, Clock-Driven and Event-Driven Scheduling, Rate Monotonic Scheduling (RMS), Earliest Deadline First (EDF) Scheduling. (Text 2: 2.1, 2.2, 3.1 to 3.3)	8
III	Introduction to Task Scheduling: Task Scheduling and Context Switching, Pre-emptive and Non-Pre-emptive Scheduling, Priority Inversion Problem and Solutions, Multiprocessor Scheduling, Partitioned Scheduling, Global Scheduling, Hybrid Scheduling, Case Studies of Real-Time Scheduling Algorithms. (Text 1: 5.1, 5.2, 5.3, 6.1 to 6.3, 7.1 to 7.3)	8
IV	Introduction to Inter-Task Communication and Synchronization: Shared Data and Mutual Exclusion, Message Passing Mechanisms, Event Synchronization Deadlock: Detection, Prevention, and Avoidance. (Text 2: 5.1 to 5.6)	9
V	Introduction to Real-Time System Development Tools: Integrated Development Environments (IDEs), Debuggers, Simulators, and Profilers, Case Studies of RTOS: FreeRTOS, VxWorks, and RT-Linux, Real-Time Control Systems, Safety-Critical Systems, Performance Analysis and Optimization, Timing Analysis, Resource Optimization. (Text 1: 8.1 to 8.3, 9.1 to 9.3, 10.1 to 10.4)	9

Syllabus for the Academic Year 2025-26

Text Books:

Sl. No.	Text Book title	Author	Volume and Year of Edition
1	Real-Time Systems	Jane W. S. Liu	Integre - Technical Publications Co. Inc.,, 2000
2	Real-Time Systems: Design Principles for Distributed Embedded Applications	Hermann Kopetz	Springer, 3rd Edition, 2019

Reference Books:

Sl. No.	Text Book title	Author	Volume and Year of Edition
1	Real Time Operating system Book1 The Foundations	Jim Cooling	Amazon Digital Services LLC - Kdp, 2018
2	Real Time Operating system Book 2 The Practice- Using STM Cube, FreeRTOS and the STM32 Discovery Board: 1 (Engineering of Real-Time Embedded Systems)	Jim Cooling	Amazon Digital Services LLC - Kdp, 2019

Course Outcomes:

Course outcome	Descriptions
CO1	Apply Real time systems and real-time design issues. (L3)
CO2	Infer the Static and Dynamic Scheduling (L2)
CO3	Develop the RTOS Architecture, RTOS Services. (L3)
CO4	Outline Inter task communication and synchronization. (L2)
CO5	Interpret the case studies in real time system development tools. (L2)

Department: Electronics and Communication Engineering			Semester: 5
Subject: Sensors and Instrumentation			
Subject Code:	22EC5OE51	L – T – P – S:	42-0-0-48 (In Hrs)
		Credits:	3

Sl. No	Course Objectives
1	Study the commonly used sensors in industry for measurement of temperature, position, accelerometer, vibration sensor, flow and level.
2	Learn the use of sensors for measurement of displacement, force and pressure.
3	Understand the fundamentals of intelligent sensors.
4	Acquire the knowledge about the data acquisition system using ADC.

Module	Description	Hrs
I	Sensors&Transducer: Introduction to sensors/transducers, Principles, Classification, Parameter, Environmental parameters, Characterization. (Text 1: 1.1 to 1.6)	8
II	Mechanical and Electromechanical Sensors: Introduction, Resistive potentiometer, Strain gauge, Inductive sensors, Capacitive sensors, Force sensors, Ultrasonic sensors. (Text 1: 2.1 to 2.7)	8
III	Thermal, Magnetic and Radiation sensors: Introduction, Gas thermometric sensors, Thermal expansion type thermometric sensors, Acoustic temperature sensors, Magneto resistive sensors, Hall effect sensors, Inductive and eddy current sensors, Basic characteristics of radiation sensors, Types of photo detectors. (Text 1: 3.1 to 3.4, 4.1 to 4.5, 5.1, 5.2 and 5.3)	8
IV	Data Acquisition and Conversion: Introduction, Objectives of data acquisition system, Signal conditioning of inputs, Single channel DAS, Multichannel DAS, Computer based DAS, Digital to analog converters and analog to digital converters. (Text 2: 6.1 to 6.7)	9
V	Smart Sensors: Introduction, Primary sensors, Excitation, Amplification, Filters, Converters, Compensation, Information or processing, Data communication, The automation. (Text 2: 7.1 to 7.10)	9

2	Lab VIEW Graphical Programing II	Gary Johnson	McGraw Hill , 2 nd edition, 1997

Course Outcomes:

Course outcome	Descriptions
CO1	Understand the theory and working of sensors and instrumentation systems.(L1)
CO2	Illustrate the use of mechanical, thermal, magnetic and radiation sensors. (L2)
CO3	Identify and use of different data acquisition systems.(L3)
CO4	Apply intelligent instrumentation in industrial automation.(L3)
CO5	Evaluate the sensors and smart sensors. (L3)

Department: Electronics and Communication Engineering			Semester: 5
Subject: Information Theory and Coding			
Subject Code:	22EC5OE52	L – T – P – S:	42-0-0-48 (In Hrs)
		Credits:	3

Sl. No.	Course Objectives
1	Explain the concept of Source Entropy and Information Rate with reference to dependent and independent sources.
2	Construct various Source encoding Algorithms.
3	Identify the basics of discrete communication channels to compute channel capacity.
4	Build various error control coding algorithms for reliable data transmission.

Module	Description	Hrs
I	Information Theory: Introduction, Measure of Information, Average Information Content of Symbols in Long Independent Sequences, Average Information Content of Symbols in Long Dependent Sequences, Some properties of Entropy, Extension of a DMS, Markoff Statistical Model for Information Sources, Entropy and Information Rate of Markoff Sources. (Text 1: 4.1, 4.2, 4.3, 4.3.1) (Text 2: 2.1)	9
II	Source Coding: Introduction, Properties of Codes, Prefix Codes, Kraft McMillan Inequality property, Code Efficiency and Redundancy, Source Coding theorem, Huffman codes. (Text 2: 2.2, 2.3)	8
III	Communication Channels: Introduction, Discrete Communication Channels, Channel Models, Channel Matrix, Joint probability Matrix, System Entropies, Mutual Information and properties of Mutual information, Rate of Information transmission over discrete channel, Channel capacity. (Text 2: 2.4 to 2.9) (Text 1: 4.5, 4.6)	8
IV	Error control coding: Introduction, methods of Controlling Errors, Types of Errors, types of Codes, Linear Block Codes: matrix description of Linear Block Codes, Error Detection and Error Correction Capabilities of Linear Block Codes. (Text 1: 9.1, 9.2)	8
V	Binary Cyclic Codes: Introduction, Algebraic Structure of Cyclic Codes, Encoding using an (n-k) Bit Shift register, Syndrome Calculation, Error Detection and Correction. Convolution Codes: Convolution Encoder, Time domain approach, Transform domain approach. (Text 1: 9.3, 9.3.1, 9.3.2, 9.3.3) (Text 2: 8.6)	9

Text Books:

Sl. No.	Text Book title	Author	Volume and Year of Edition
1	Digital and Analog communication systems.	K. Sam Shanmugam	John Wiley India Pvt. Ltd, 2012
2	Digital communication.	Simon Haykin	John Wiley India Pvt. Ltd, 2013

Reference Books:

Sl. No.	Text Book title	Author	Volume and Year of Edition
1	Error Control Coding.	Shu Lin and Daniel J Costello	Pearson Education Limited, 2 nd Edition, 2011
2	ITC and Cryptography.	Ranjan Bose	TMH, 2 nd Edition, 2007
3	Elements of Information Theory.	Thomas Cover, Joy Thomas	John Wiley, 1991

Course Outcomes:

Course outcome	Descriptions
CO1	Identify the basic knowledge for measuring Information and entropy of independent & dependent sources. (L2)
CO2	Apply source encoding algorithms to compress data effectively. (L3)
CO3	Apply the concepts of discrete communication channels to compute and channel capacity for discrete communication channels. (L3)
CO4	Construct Linear Block Codes and use them for error detection and correction. (L3)
CO5	Develop Binary Cyclic and Convolutional Codes and apply them for error detection and correction. (L3)

Department: Electronics and Communication Engineering			Semester:	5
Subject: Digital System Design Using Verilog				
Subject Code:	22EC5OE53	L – T – P – S:	42-0-0-48	(In Hrs)
			Credits:	3

Sl. No.	Course Objectives
1	Learn the notions of digital system design using an integrated development environment for design entry through Verilog.
2	Understand the difference between concurrent and sequential programming.
3	Study verilog modelling styles for digital circuits.
4	Acquire knowledge of binary arithmetic circuits.

Module	Description	Hrs
I	Introduction to Verilog: Introduction to HDL, history of HDLs, capabilities. Modules and ports, Expressions. Basic concepts: Lexical conventions, data types, system tasks and compiler directives. (Reference Text 2: 1.1 to 1.3, 2.1,4.1 to 4.2) (Text1:3.1 to 3.4,)	9
II	Gate level Modeling: Gate types, gate delays, examples. Timing and delays: Types of delay models, path delay models. (Text1: 5.1 to 5.3,10.1 to 10.2)	8
III	Behavioral Modeling: Structured procedures, procedural assignments, timing controls, conditional statements, multiway branching, generate blocks, examples. (Text1: 7.1 to 7.6, 7.8 to 7.10)	8
IV	Data flow Modeling: Continuous assignments, delays, expression, operators and operands, operator types, Examples. Tasks and Functions: Difference between tasks and functions, tasks, functions. (Text1: 6.1- 6.6, 8.1 to 8.4)	8
V	Design of networks for arithmetic operations: Design of a serial adder with accumulator, State graphs for control networks, Design of a binary multiplier, Multiplication of signed binary numbers, Design of a binary	9

Department: All branches (Choice based)				Semester:	5
Subject: Research Methodology					
Subject Code:	22IE561	L – T – P – S:	42-0-0-48	(In Hrs)	
			Credits:	3	

Sl. No.	Course Objectives
1	To give an overview of the research methodology and explain the technique of defining a research problem.
2	To explain carrying out a literature search, its review and to explain various research designs and their characteristics.
3	To explain the details of sampling designs, and also different methods of data collections.
4	To develop theoretical, conceptual frameworks, writing a review, to explain the art of interpretation and the art of writing research reports.

Module	Description	Hrs
I	Research Methodology: Introduction, Meaning of Research, Objectives of Research, Motivation in Research, Types of Research, Research Approaches, Significance of Research, Research Methods versus Methodology, Research and Scientific Method, Importance of Knowing How Research is Done, Research Process, Criteria of Good Research, and Problems Encountered by Researchers in India. Defining the Research Problem: Research Problem, Selecting the Problem, Necessity of Defining the Problem, Technique Involved in Defining a Problem, An Illustration. (Text 1: Chapter 1, 2) Bloom's Taxonomy Level: L₁ – Remembering, L₂ – Understanding.	6
II	Reviewing the literature: Place of the literature review in research, Bringing clarity and focus to your research problem, Improving research methodology, Broadening knowledge base in research area, Enabling contextual findings, How to review the literature, searching the existing literature, reviewing the selected literature, Developing a theoretical framework, Developing a conceptual framework, Writing about the literature	5

Syllabus for the Academic Year 2025-26

	reviewed. (Text 2: Chapter 3) Bloom's Taxonomy Level: L ₁ – Remembering, L ₂ – Understanding.	
III	Research Design: Meaning of Research Design, Need for Research Design, Features of a Good Design, Important Concepts Relating to Research Design, Different Research Designs, Basic Principles of Experimental Designs, Important Experimental Designs. Design of Sample Surveys: Introduction, Sample Design, Sampling and Non-sampling Errors, Sample Survey versus Census Survey, Types of Sampling Designs. (Text 1: Chapter 3, 4.1 – 4.6) Bloom's Taxonomy Level: L ₁ – Remembering, L ₂ – Understanding.	7
IV	Data Collection: Experimental and Surveys, Collection of Primary and Secondary Data, Selection of Appropriate Method for Data Collection, Case Study Method. Hypothesis- Basic concepts, types of hypothesis, Formulation of hypothesis, testing of hypothesis, Analysis of data, Interpretation of data-Meaning of Interpretation, Technique of Interpretation, Precaution in Interpretation, Editing, classification and tabulation. (Text 1: Chapter 6, 9.1-9.4, 14.1 – 14.4) Bloom's Taxonomy Level: L ₁ – Remembering, L ₂ – Understanding.	6
V	Report Writing: Significance of Report Writing, Different Steps in Writing Report, Layout. Types of Reports, Oral Presentation, Mechanics of Writing a Research Report, Precautions for Writing Research Reports. Research ethics, Citations, Similarity check. (Text 1: Chapter 14.5 – 14.20, Text 2: Chapter 6)	4

Text Books:

Sl. No.	Text Book title	Author	Volume and Year of Edition
1	Research Methodology: Methods and Techniques	C.R. Kothari, Gaurav Garg	New Age International 4th Edition, 2018
2	Research Methodology a step-by-step guide for beginners. (For the topic Reviewing the literature under module 2)	Ranjit Kumar	SAGE Publications Ltd. 3 rd Edition, 2011

SRI SIDDHARTHA ACADEMY OF HIGHER EDUCATION TUMAKURU
(Deemed to be University, Accredited A⁺ Grade by NAAC, New Delhi.)
SRI SIDDHARTHA INSTITUTE OF TECHNOLOGY-TUMAKURU
(A constituent College of Sri Siddhartha Academy of Higher Education, Tumakuru.)
Department is Accredited by NBA
Syllabus for the Academic Year 2025-26

Department: All branches (Choice based)		Semester:	5
Subject: Management and Entrepreneurship			
Subject Code:	22IE562	L – T – P – S:	28-0-0-32 (In Hrs)
		Credits:	2

Sl. No.	Course Objectives
1	Explain fundamentals of management, functions of a manager, planning, organizing, and staffing, decision making processes and organizational structure.
2	Describe the understanding of motivation and different control systems in management, leadership process, Entrepreneurship and its development process.
3	Know about Small Scale Industries, industrial ownership, various types of supporting agencies and financing available for an entrepreneur and summarize the preparation of project report, need and significance of report writing.
4	Define various forms of the intellectual property, its relevance and business impact in the changing global business environment and discuss leading International Instruments concerning Intellectual Property Rights.

Module	Description	Hrs
I	Introduction - Meaning, nature and characteristics of management, scope and Functional areas of management, goals of management, levels of management, Planning - Nature, importance, types of plans, steps in planning, Organizing - nature and purpose, types of Organization, Staffing- meaning, process of recruitment and selection. Directing and controlling - meaning and nature of directing, leadership styles, motivation Theories, Communication- Meaning and importance, Coordination meaning and importance, Controlling- meaning, steps in controlling, methods of establishing control. Bloom's Taxonomy Level: L ₁ – Remembering, L ₂ – Understanding.	6
II	Entrepreneur – meaning of entrepreneur, characteristics of entrepreneurs, classification and types of entrepreneurs, various stages in entrepreneurial process, role of entrepreneurs in economic development, entrepreneurship in India and barriers to entrepreneurship. Identification of business opportunities, market feasibility study, technical feasibility study, financial feasibility study and social feasibility study. Bloom's Taxonomy Level: L ₁ – Remembering, L ₂ – Understanding.	5

Syllabus for the Academic Year 2025-26

III	Preparation of project and ERP (Enterprise resource planning) - meaning of project, project identification, project selection, project report, need and significance of project report, contents, formulation, guidelines by planning commission for project report, Enterprise Resource Planning: Meaning and Importance- ERP and Functional areas of Management – Marketing / Sales- Supply Chain Management – Finance and Accounting – Human Resources – Types of reports and methods of report generation. Bloom's Taxonomy Level: L₁ – Remembering, L₂ – Understanding.	5
IV	Micro and Small Enterprises: Definition of micro and small enterprises, characteristics and advantages of micro and small enterprises, steps in establishing micro and small enterprises, Government of India industrial policy 2007 on micro and small enterprises, case studies in respective domains. Institutional support: MSME-DI, NSIC, SIDBI, KIADB, KSSIDC, TECSOK, KSFC, DIC and District level single window agency. Bloom's Taxonomy Level: L₁ – Remembering, L₂ – Understanding.	6
V	Intellectual Property: Introduction to IP: Importance of IPR, International conventions / agreements / treaties, Origin of IP law and history, laws related to IP in India: Indian Patent Act 1970, WIPO. Patents: Criteria for patentability, patentable and non-Patentable Matters, introduction to Prior Art Search, types of patent application: ordinary, convention, PCT, divisional and Patent of addition, filing procedure, drafting complete specification and claims. Copyright: Criteria, filing procedure, Copyright Infringement, rights of authorship and ownership, Fair Use, first sale doctrine, moral rights and economic rights. Trademarks: definition, eligibility Criteria, types of patents, filing procedure, Classification of Trademarks and well-known mark Geographical Indications: Definitions, importance, filing procedure, GI ecosystem in India and case laws Industrial design: eligibility criteria, Non-Protectable Industrial Designs India, Procedure for Registration, importance of design registration. Bloom's Taxonomy Level: L₁ – Remembering, L₂ – Understanding.	6

Text Books:

1	Management and Entrepreneurship	Kanishka Bedi	Oxford University Press-2017
2	Entrepreneurship Development	S S Khanka	S Chand & Co.
3	Dynamics of Entrepreneurial Development & Management -	Vasant Desai	Himalaya Publishing House

Course Outcomes:

Course outcome	Descriptions
CO1	Explain functions of a manager, planning and decision making processes, Organizational structure, staffing and leadership processes. (L2)
CO2	Describe the understanding of motivation and different control systems in management, understanding of Entrepreneurships and its development process. (L2)
CO3	Outline Small Scale Industries, various types of supporting agencies and financing available for an entrepreneur. Summarize the preparation of project report, need and significance of report. (L2)
CO4	Apply the knowledge of patent and copyright for the innovative research works and provide the way for developing ones idea for innovations. (L3)
CO5	Paraphrase Intellectual Property and its types, Geographical Indications. (L2)

Syllabus for the Academic Year 2025-26

Department: All branches (Choice based)		Semester:	5
Subject: Project Management			
Subject Code:	22IE563	L – T – P – S:	28-0-0-32 (In Hrs)
		Credits:	2

Sl. No	Course Objectives
1	Understand the scope, timing and quality of the project, and to analyze the project goals, constraints, deliverables, performance criteria, control needs and resource requirement in consultation with stake holders.
2	Implement the process of project management, life cycle and the embodied concepts, tools and techniques in order to achieve project success.
3	Understand the team efforts and stakeholders in professional manner, respecting differences, to ensure a collaborative project environment.
4	Apply project management practices to new programs, initiatives, products, services and events relative to the needs of stakeholders.

Module	Description	Hrs
I	Introduction: Project, Program, and portfolio, Operations management, Product life cycle, Project life cycle, Project management life cycle, Role of project manager and office, Ten Project Knowledge areas with their associated processes Project Integration Management: Develop project charter, Develop project management plan, Direct & manage project work, Monitor control project, Perform integrated change control, Close project / phase. Bloom's Taxonomy Level: L ₁ – Remembering, L ₂ – Understanding. L3- Analyzing	6
II	Project scope management: Plan scope management, Collect requirements, Define scope, Create WBS (Work Breakdown Structure), Validate Scope, Control scope. Project Schedule management: Plan Schedule management Define activities, Sequence activities, Estimate activity durations, Develop schedule, and Control schedule. Bloom's Taxonomy Level: L ₁ – Remembering, L ₂ – Understanding. L3- Analyzing	5
III	Project cost management: Plan cost management, Estimate cost, Determine budget, and Control costs. Project quality management: Plan quality management, Manage	6

Syllabus for the Academic Year 2025-26

	quality and Control quality Project resource management: Plan resource management, Estimate activity resources, Acquire resources, Develop team, Manage team and Control resources. Bloom's Taxonomy Level: L ₁ – Remembering, L ₂ – Understanding. L3- Analyzing	
IV	Project communication management: Plan communication management , Manage communications and Monitor communications Project risk management: Plan risk management, Identify risks, Perform qualitative risk analysis, Perform quantitative risk analysis, Plan risk responses, Implement risk responses and Monitor risks. Project Procurement management: Plan procurement management, Conduct procurement, Control procurements. Bloom's Taxonomy Level: L ₁ – Remembering, L ₂ – Understanding. L3- Analyzing	6
V	Project stake holder management: Identify stake holders, Plan stake holder management, Manage stake holder engagement, and Monitor stake holder engagement. A case study relevant to the domain knowledge of the department is taken up to explain the principles of the project management as brought out above. Bloom's Taxonomy Level: L ₁ – Remembering, L ₂ – Understanding. L3- Analyzing	5

(A constituent College of Sri Siddhartha Academy of Higher Education, Tumakuru.)
Department is Accredited by NBA
Syllabus for the Academic Year 2025-26

Course Outcomes:

Course outcome	Descriptions
CO1	Outline the procedure for analyzing a project and define the rational of work break structure. (L2)
CO2	Illustrate the use of network techniques for successful project implementation. (L2)
CO3	Design the procedure for overall financial analysis of the project alongside the resources requirement and ideal quality. (L3)
CO4	Identify the sources and process for communication, risk management and procurement and build a comprehensive plan for the stakeholder management. (L1)
CO5	Identify stake holders, plan, management, engagement, and monitor. (L1)

Department is Accredited by NBA
Syllabus for the Academic Year 2025-26

Department: Electronics and Communication Engineering	Semester: 5
--	--------------------

Subject: Dept. Skill Lab-3 (Embedded system design lab using ARM)				
Subject Code:	22EC507		L – T – P - S:	14-0-28-18
			Credit	2

Sl. No.	Course Objectives
1	Understand the architecture and programming of embedded controllers and peripherals.
2	Develop programs to interface peripheral devices using embedded C.
3	Implement real-time embedded applications involving timers, interrupts, and serial communication.
4	Design embedded systems using RTC, PLL, and Watchdog Timer concepts.

LAB CONTENT:

Sl. No	Experiment Description
1	Interface a 4x4 matrix keypad with the LPC2128 microcontroller and display the pressed key on the LCD.
2	Convert analog signals from a potentiometer to digital using the Analog-to-Digital Converter (ADC) of the LPC2128 microcontroller.
3	Generate PWM signals using the PWM module of the LPC2128 microcontroller and control the brightness of an LED.
4	Implement interrupt-driven programming to toggle an LED in response to a button press.
5	Establish UART communication between the LPC2128 microcontroller and a computer, and transmit and receive data.
6	Implement timer-based applications such as generating delays and periodic interrupts.
7	Interface an external EEPROM memory with the LPC2128 microcontroller and store and retrieve data using I2C
8	Demonstrate real-time clock (RTC) interfacing and time display.
9	Configure PLL to set system clock and verify timing accuracy.
10	Program and test the functionality of the Watchdog Timer.
11	Develop a simple real-time operating system (RTOS) application using Free RTOS on the LPC2128 microcontroller.(DEMO)

3	Programming Embedded Systems in C and C++	Michael Barr, Anthony Massa	O'Reilly Media, 2nd Edition, 2006

Course Outcomes:

Course outcome	Descriptions
CO1	Describe the architecture and features of microcontrollers. (L2)
CO2	Apply embedded C programming for interfacing devices. (L3)
CO3	Develop embedded applications using timers, ADCs, and communication modules. (L3)
CO4	Demonstrate the use of real-time clock, PLL, and watchdog timer. (L3)
CO5	Design and construct embedded mini-projects using peripheral modules. (L3)

Department is Accredited by NBA
Syllabus for the Academic Year 2025-26

Department: All branches			Semester: 5
Subject: Skill Development-II (Aptitude Skills)			
Subject Code:	22SK508	L – T – P – S:	14-0-0-16 (In Hrs)
			Credits: 1

Sl. No	Course Objectives
1	To equip students with quantitative aptitude skills required for competitive exams.
2	To develop the ability to interpret, analyze, and solve data-driven problems using arithmetic and visual methods.
3	To enhance problem-solving strategies in areas such as probability, permutations, combinations, and data sufficiency.
4	To apply mathematical and logical concepts in real-world problem-solving scenarios like time, work, and distance.

Module	Description	Hrs
I	Logical Aptitude - Syllogism, Venn-diagram method, Three statement syllogism, Deductive and inductive reasoning. Introduction to puzzle and games organizing information, parts of an argument, common flaws, arguments and assumptions. Linear Seating Arrangement - Single or Double rows facing each other or away from each other in the same direction. Circular Seating Arrangement – Uni- & Bi-directional problems on Circular, Square, Rectangular, Hexagonal tables. Coding Decoding: Letter Coding, Number Coding, symbol coding Crypt arithmetic: Basic concepts , addition , subtraction, multiplication of coded alphabets, Types of cryptarithm, Clocks and Calendar. Reasoning – Verbal - Blood Relation, Sense of Direction, Arithmetic & Alphabet. Non- Verbal reasoning - Visual Sequence, Visual analogy and classification. Analytical Reasoning - Single & Multiple comparisons, Linear Sequencing.	3
II	Permutation and Combination: Understanding the difference between the permutation and combination, Rules of Counting-rule of addition, rule of multiplication, factorial function, Concept of step arrangement, Permutation of things when some of them are identical, Concept of 2n, Arrangement in a circle. Probability: Single event probability, multi event probability, independent events and dependent events, mutually exclusive events, non-mutually exclusive events, combination method for finding the outcomes.	3

Syllabus for the Academic Year 2025-26

III	Number System: Divisibility & Remainder, Multiples & Factors, Integers, LCM & HCF, Complete a number Series, Find the Missing Term and Wrong Term. Simplification: BODMAS Rule, Approximation, Decimals, Fractions, Surds & Indices. Percentage: Calculation-oriented basic percentage, Profit and Loss, Successive Selling type, Discount & MP, Dishonest Dealings, Partnerships. Interest: Simple Interest, Compound Interest, Mixed Interest, Instalments. Data Interpretation: Approach to interpretation, simple arithmetic, rules for comparing fractions, Calculating (approximation) fractions, short cut ways to find the percentages, Classification of data - Tables, Bar graph, line graph, Cumulative bar graph, Pie graph, Combination of graphs. Combination of table and graphs.	3
IV	Averages and Allegations mixtures: Average: relevance of average, meaning of average, properties of average, deviation method, concept of weighted average. Allegation method: a situation where allegation technique, general representation of allegations, the straight line approach, application of weighted average and allegation method in problems involving mixtures. Application of allegation on situations other than mixtures problems. Data Sufficiency: Questions based on - Quantitative aptitude, Reasoning aptitude, Puzzles.	3
V	Ratio and Proportion: Simple Ratios, Compound Ratios, Comprehend and Dividend, Direct & Indirect Proportions, Problems on ages, Mixtures & Allegation. Speed, Time and Distance: Relative Speed, Average Speed, Problems on Train, Boat & Stream. Time and Work: Work Efficiency, Work & Wages, Pipes & Cisterns.	2

Department: Electronics and Communication Engineering			Semester: 6
Subject: Microwave Theory and Antennas			
Subject Code:	22EC601	L – T – P – S:	42-0-0-48 (In Hrs)
		Credits:	3

Sl. No.	Course Objectives
1	Understand the basic concept of microwave devices.
2	Learn the representation of microwave networks and analyse the port details of microwave devices.
3	Acquire the knowledge of antenna basics and types of antennas.
4	Know the applications of microwaves and antennas.

Module	Description	Hrs
I	Microwave Vacuum Tubes: Introduction, Reflex Klystron Oscillator, Mechanisms of Oscillations, Modes of oscillations, Travelling wave Tube Amplifier, Magnetron Oscillator (Qualitative discussion, construction, operation). Microwave solid state devices: PIN diode and its applications, Gunn diode (Theory of operation) (Text 2: 9.1 to 9.4, 10.2.6, 10.3)	9
II	Microwaves: Introduction, Transmission lines (end equations only for Reflection Coefficient and Transmission Coefficient, Standing Wave and Standing Wave Ratio), Smith Chart. Microwave Network Theory and Passive Devices: Introduction, Scattering or S-Matrix Representation of Multiport Network, Properties of S-parameters. Microwave Passive Components: Coaxial Cables, Coaxial Line to Waveguide Adapters, Attenuators, Phase Shifters (Dielectric and Precision Dielectric Phase Shifters) Waveguide Tees, Magic Tee. (Text 1: 1.1, Text 2: 6.1, 6.3, 6.3.1, 6.4.1, 6.4.11, 6.4.14, 6.4.15, 6.4.16)	9
III	Introduction to Ferromagnetic Insert and Component: Circulators, Isolators and Directional Couplers. Antenna basics: Introduction, Basic Antenna Parameters, Patterns, Beam Area, Radiation Intensity, Beam Efficiency, Directivity and Gain, Antenna Apertures, Effective Height, Radio Communication Link, Antenna Field Zones. (Text 2: 6.4.17 & 6.4.18, Text 3: 2.1 to 2.7, 2.9 to 2.11 & 2.13)	8
IV	Point Sources and Arrays: Introduction, Point Sources, Power Patterns, Power Theorem, Radiation Intensity, Arrays of two isotropic point sources, Linear Arrays of n Isotropic Point Sources of equal

Syllabus for the Academic Year 2025-26

Department: Electronics and Communication Engineering			Semester: 6
Subject: Digital Communication			
Subject Code:	22EC602	L – T – P – S:	42-0-28-50 (In Hrs)
		Credits:	4

Sl. No.	Course Objectives
1	Understand the basics of information theory.
2	Study the various waveform coding schemes.
3	Learn the various baseband transmission schemes, understand the various band pass signaling schemes and various spread spectrum techniques.
4	Acquire the fundamental knowledge of channel coding.

Module	Description	Hrs
I	Information Theory: Discrete Memory less source, Information, Entropy, Mutual Information - Discrete Memory less channels – Binary Symmetric Channel, Channel Capacity - Hartley - Shannon law - Source coding theorem - Huffman codes. (Text 1: 2.1 to 2.9)	8
II	Introduction and waveform coding techniques: Introduction, Basic signal processing operations in digital communication, PCM, Quantization noise and SNR, Robust quantization, DPCM, DM, ADM, Coding speech at low bit rates, ADPCM, Adaptive sub-band coding. (Text 1: 1.2, 5.1 to 5.8)	9
III	Base-band shaping for data transmission: Base-Band Shaping for Data Transmission, Discrete PAM signals, Power spectra of discrete PAM signals, ISI, Nyquist's criterion for distortion less base-band binary transmission, Correlative coding, Eye pattern, Base-band M-ary PAM systems, Adaptive equalization for data transmission. (Text 1: 6.1 to 6.8)	9
IV	Digital modulation techniques: Digital Modulation formats, Coherent binary modulation techniques, Coherent Quadrature modulation techniques, Non-coherent binary modulation techniques. (Text1: 7.1 to 7.4)	8
V	Spread spectrum modulation: Pseudo noise sequences, Notion of spread Spectrum, Direct sequence spread spectrum with coherent binary PSK, Frequency hop spread spectrum, Applications. Error Control Coding: Channel coding theorem - Linear Block codes - Hamming codes. (Text 1: 9.1 to 9.3, 9.6, 9.7, 8.3 to 8.4)	8

SRI SIDDHARTHA ACADEMY OF HIGHER EDUCATION TUMAKURU
(Deemed to be University, Accredited A⁺ Grade by NAAC, New Delhi.)
SRI SIDDHARTHA INSTITUTE OF TECHNOLOGY- TUMAKURU
(A constituent College of Sri Siddhartha Academy of Higher Education, Tumakuru.)
Department is Accredited by NBA
Syllabus for the Academic Year 2025-26

LAB CONTENT:

Sl. No.	Experiment Description
PART-A: Experiment Description	
1	Study the digital modulation and demodulation using Amplitude Shift Keying technique.
2	Study the digital modulation and demodulation using Frequency Shift Keying technique.
3	Study the digital modulation and demodulation using Phase Shift Keying technique.
4	Study the digital modulation and demodulation using Differential Phase Shift Keying technique.
5	Verification of sampling theorem using Flat-Top Sampling.
6	Study of mode curves of Reflex Klystron oscillator and determine a) Electronic tuning range b) Electronic tuning sensitivity.
7	Measurement of losses in a given optical fiber.
8	NA of a given optical fiber and Numerical aperture.
PART-B: Matlab Simulation	
8	Matlab code for generation of line codes
9	Matlab code for generation of DPSK waveforms
10	Matlab code for Pulse code Modulation & De-modulation
11	Matlab code to determine i) Entropy ii) Joint Entropy iii) Conditional Entropy

			064811-1
4	Digital communications.	Bernard Sklar	Pearson education, 2009.ISBN: 81-7808-373-6

Course Outcomes:

Course outcome	Descriptions
CO1	Implement and interpret various waveform coding techniques and its variants in applications like speech coding at low bit rates.(L3)
CO2	Analyze the characteristics of baseband signalling schemes and their performance. (L3)
CO3	Illustrate the band pass signalling schemes and spread spectrum techniques. (L2)
CO4	Analyze the source coding and error control coding techniques. (L3)
CO5	Outline the various spread spectrum techniques. (L1)

Course Articulation Matrix:

Department is Accredited by NBA
Syllabus for the Academic Year 2025-26

Department: Electronics and Communication Engineering			Semester: 6
Subject: Computer Communication Networks			
Subject Code:	22EC603	L – T – P – S:	42-0-28-50 (In Hrs)
		Credits:	4

Sl. No	Course Objectives
1	Familiarize with the fundamentals of communication networks, network topologies and network model (TCP/IP) for data communications.
2	Learn framing techniques, flow control, error control mechanisms and Data link, MAC protocols.
3	Understand Network layer services, Packet formats, Routing protocols and IP addressing.
4	Comprehend the Transport layer Services, TCP/UDP Packet formats & Protocols.

Module	Description	Hrs
I	Data Communications: Introduction, Components, Representations, Data Flow, Networks: Network criteria, Physical Structures, Network Types: LAN, WAN, Switching, The Internet, Accessing the internet. Network Models: TCP/IP Protocol Suite: Layered Architecture, The OSI model: OSI versus TCP/IP. Data-Link Layer: Introduction, Nodes and Links, Services, Categories of link, Two sub layers, Link Layer addressing: ARP, Data Link Control (DLC) services: Framing, Flow and Error Control, Simple protocol, Stop and wait protocol. (Text 1: 1.1 - 1.1.3, 1.2, 1.2 - 1.2.2, 1.3 - 1.3.5, 2.2 - 2.2.3, 2.3, 2.3.1, 9.1 - 9.1.4, 9.2 - 9.2.2, 11.1 - 11.1.2, 11.2.1, 11.2.2)	9
II	Media Access Control: Introduction. Random Access: ALOHA, CSMA, CSMA/CD, CSMA/CA. Controlled Access: Reservation, Polling, Token Passing. Channelization: FDMA, TDMA, CDMA. Wired and Wireless LANs: IEEE project 802, Ethernet Evolution, Standard Ethernet: Characteristics, Efficiency, Implementation. Wireless LANs: Characteristics, Access control, IEEE 802.11 project: Architecture, MAC Sub layer, Bluetooth: Architecture. (Text 1: 12.1 - 12.1.4, 12.2.1 - 12.2.3, 12.3 - 12.3.3, 13.1.1, 13.1.2, 13.2, 13.2.1, 13.2.4, 13.2.5, 15.1.2, 15.1.3, 15.2, 15.2.1, 15.2.2, 15.3, 15.3.1)	9
III	Connecting Devices: Introduction, Hubs, link layer Switches, Routers, Virtual LANs: Membership, Configuration.	8

SRI SIDDHARTHA ACADEMY OF HIGHER EDUCATION TUMAKURU
(Deemed to be University, Accredited A⁺ Grade by NAAC, New Delhi.)
SRI SIDDHARTHA INSTITUTE OF TECHNOLOGY- TUMAKURU
(A constituent College of Sri Siddhartha Academy of Higher Education, Tumakuru.)
Department is Accredited by NBA
Syllabus for the Academic Year 2025-26

	Network Layer: Introduction, Network Layer services: Packetizing, Routing and Forwarding, Packet switching, Datagram Approach, Virtual circuit approach. IPv4 Addresses: Address Space, Classful Addressing, Classless Addressing, Network Address Translation. (Text 1: 17.1.1 - 17.1.3, 17.2, 18.1 - 18.1.2, 18.2.1, 18.2.2, 18.4 - 18.4.3, 18.4.5)	
IV	Network Layer Protocols: Introduction, Internet Protocol (IP): Datagram Format, Security of IPv4 Datagram, Mobile IP: Addressing, Agents, Three Phases, Inefficiency in Mobile IP. Next Generation IP: IPV6 Addressing, Representation, Address Space, IPV6 Protocol- packet format, Transition from IPv4 To IPv6, Strategies. Uni-cast Routing: Routing Algorithms: Distance Vector Routing, Link State Routing. (Text 1:19.1, 19.1.1, 19.1.4, 19.3 - 19.3.4, 22.1 - 22.1.2, 22.2, 22.2.1, 22.4, 22.4.1, 20.2, 20.2.1, 20.2.2)	8
V	Transport Layer: Transport Layer Services, Protocols, Transport Layer Protocols: Go-Back-N Protocol, Selective Repeat protocol. Transport Layer Protocols in the Internet: User Datagram Protocol: User Datagram, UDP Services, UDP Applications, Transmission Control Protocol: TCP Services, TCP Features, TCP Segment, TCP Connection. (Text 1: 23.1.1, 23.2, 23.2.3, 23.2.4, 24.2, 24.2.1, to 24.2.3, 24.3, 24.3.1 - 24.3.4)	8

LAB CONTENT:

Sl. No.	Experiment Description
1	Implement Bit stuffing & De-stuffing Algorithm.
2	Implement Character stuffing & De-stuffing Algorithm.
3	Implement Encryption and Decryption algorithms.
4	Implement STOP and WAIT protocol, Sliding window protocol.
PART-B : Simulation Experiments using Cisco Packet tracer/NS2/NS3	
5	Simulate a four-node point to point network with duplex links between them and set the queue size to vary bandwidth and to find the number of packets dropped.
6	Simulate different types of internet traffic such as FTP and TELNET over a network to analyze the throughput.
7	Simulate Ethernet LAN using n nodes and set multiple traffic nodes to determine collision across different node.
8	Test and verify Network configurations using Cisco Packet Tracer.
9	Perform an Initial Router configuration Cisco Packet Tracer.
10	Perform OSPF configuration using Cisco Packet Tracer.

(Deemed to be University, Accredited A⁺ Grade by NAAC, New Delhi.)
SRI SIDDHARTHA INSTITUTE OF TECHNOLOGY- TUMAKURU
(A constituent College of Sri Siddhartha Academy of Higher Education, Tumakuru.)
Department is Accredited by NBA
Syllabus for the Academic Year 2025-26

Text Books:

Sl. No.	Text Book title	Author	Volume and Year of Edition
1	Data Communication and Networking	B Forouzan	McGraw Hill, 2013, 5 th Edition

Reference Books:

Sl. No.	Text Book title	Author	Volume and Year of Edition
1	Computer Networks	James F.Kurose, Keith W.Ross	Pearson Edu., 2 nd Edition, 2003
2	Introduction to Data Communication and Networking	Wayne Tomasi	Pearson Edu., 2007
3	Computer Networks	V.S. Bagadandl. A .Dotre	Technical publications, 2 nd edition, 2009.
4	Computer networks	Andrew S.Tenenbaum	Pearson Prentice hall, 2010, 4 th Edition

Course Outcomes:

Course outcome	Descriptions
CO1	Outline the requirements of data communications and functions of layers in the TCP/IP network model for data communications. (L2)
CO2	Interpret and illustrate services and protocols of different layers. (L2)
CO3	Summarize and simulate wired, wireless LAN technologies and connecting devices. (L2)
CO4	Analyze different addressing mechanisms of data link layer and network layer. (L3)
CO5	Compare the services and applications of routing algorithms and transport layer protocols. (L4)

Syllabus for the Academic Year 2025-26

Department: Electronics and Communication Engineering			Semester: 6
Subject: Machine Learning			
Subject Code:	22EC6PE41	L – T – P – S:	42-0-0-48 (In Hrs)
		Credits:	3

Sl. No.	Course Objectives
1	Explain a spectrum of machine learning algorithms with a sound mathematical background.
2	Summarize supervised learning methods and its evaluation metrics.
3	Identify Unsupervised learning methods and their evaluation metrics.
4	Infer knowledge of Bayesian techniques for solving problems in machine learning.

Module	Description	Hrs
I	Introduction To Machine Learning: Machine learning Landscape: Purpose of Machine Learning, examples of applications, Types of ML, main challenges of ML, Testing & Validating End to end Machine learning Project: Working with real data, look at the big picture, Get the data, Discover, and visualize the data, Prepare the data, select, and train the model, Fine tune your model. (Text 1: Chapter 1 & 2)	9
II	Supervised learning: Linear Regression, Multiple Linear Regression, Logistic Regression, K Nearest Neighbours, Decision Trees: ID3, Classification and Regression Trees, Support Vector Machines: Linear and Non-Linear, Kernel Functions. (Text 1: Chapter 4)	9
III	Design and analysis of machine learning experiments Guidelines for machine learning experiments, Cross Validation (CV) and resampling – K-fold CV, bootstrapping, measuring classifier performance, assessing a single classification algorithm, and comparing two classification algorithms – t test, McNemar's test, K-fold CV paired t test. (Text 2: Chapter 19)	8
IV	Ensemble techniques and unsupervised learning: Combining multiple learners: Model combination schemes, Voting, Ensemble Learning - bagging, boosting, stacking, Unsupervised learning: Introduction to Clustering, K-means clustering, Dimensionality reduction-Principal Component Analysis. (Text 1: Chapter 7)	8
	Classifying with probabilistic models: Bayes Theorem, Concept

1	Pattern Recognition and Machine Learning Christopher M. Bishop 1 st Springer 2006	Pattern Recognition and Machine Learning Christopher M. Bishop 1 st Springer 2006	Pattern Recognition and Machine Learning Christopher M. Bishop 1 st Springer 2006

Course Outcomes:

Course outcome	Descriptions
CO1	Choose machine learning techniques in computing systems. (L2)
CO2	Apply Supervised learning algorithms to do prediction and classification(L3)
CO3	Interpret evaluation techniques and statistical tests used for assessing classifier performance
CO4	Build unsupervised learning algorithms to learn patterns from given training set of unlabeled data points. (L3)
CO5	Outline the Bayesian techniques and explain the learning rules. (L3)

Department: Electronics and Communication Engineering			Semester: 6
Subject: Analog and Mixed Signal VLSI Design			
Subject Code:	22ECPE642	L – T – P – S:	42-0-0-48 (In Hrs)
		Credits:	3

Sl. No	Course Objectives
1	Learn the layout issues of analog and digital system design.
2	Study and compare different architectures of data converters and their SNRs with pros and cons.
3	Understand the fabrication steps at submicron technology.
4	Acquire the knowledge of single stage amplifiers using MOSFET.

Module	Description	Hrs
I	DAC Fundamentals & Architectures: Introduction, DAC Specifications, Mixed Signal Layout Issues. DAC Architectures: Resistors String, R-2R Ladder Networks, Charge Scaling DAC (Excluding Split Array), Cyclic DAC, Pipeline DAC, Problems on all types of DAC. (Text 1: 28.4, 28.6, 29.1.2, 29.1.3, 29.1.5, 29.1.6, 29.1.7)	9
II	ADC Fundamentals & Architectures: Introduction, Analog versus Digital Discrete Time Signals, Sample and Hold characteristics, ADC Specifications, ADC Architectures: Flash ADC, 2-step Flash ADC, Pipeline ADC, Integrating ADC, Successive Approximation ADC (excluding charge redistribution SAR), Problems on all types of ADC. (Text 1: 28.1, 28.3, 28.5, 29.2.1, 29.2.2, 29.2.3, 29.2.4, 29.2.5)	9
III	Sampling and Aliasing: Impulse Sampling, Quantization noise, Spectral density of quantization noise. Data Converter SNR: Improving SNR using averaging (Excluding jitter & averaging onwards), Decimating filters for ADCs (Excluding decimating without averaging onwards), and Interpolating filters for DAC. (Text 2: 30.1.1, 30.3.2, 31.1.1, 31.1.2, 31.2.1, 31.2.2, 31.2.3)	8
IV	Sub-Micron CMOS Circuit Design: Submicron Capacitors and Resistors. Digital Circuit Design: MOSFET switch (up to bidirectional switches), Delay, Adder elements. Analog Circuits Design: MOSFET biasing (up to MOSFET Transition Frequency) (Text 2: 33.1.2, 33.2.1, 33.2.2, 33.2.3, 33.3.1)	8
	Single Stage Amplifiers: Basic concepts, Common Source Amplifier with

Department: Electronics and Communication Engineering			Semester: 6
Subject: Information Security and Cyber Space			
Subject Code:	22EC6PE43	L – T – P – S:	42-0-0-48 (In Hrs)
		Credits:	3

Sl. No.	Course Objectives
1	Understand the Information Security goals, and classical encryption techniques.
2	Learn the Symmetric and Asymmetric cryptography techniques in different domains and applications.
3	Study the need for cyberspace and cyber security.
4	Explain different message authentication codes, hash functions and cyberspace terminologies.

Module	Description	Hrs
I	Classical Encryption Techniques: Introduction - Cyber Attacks, Defence Strategies and Techniques, Mathematical Background for Cryptography - Modulo Arithmetic's A Model of Network Security. Classical Encryption Techniques: Symmetric Cipher Model, Substitution Techniques, Transposition Techniques. (Text 1: 1.3, 1.4, 1.5, 1.6, 2.1 to 2.5, Text 2: 1.1-1.5)	9
II	Block ciphers: Introduction, Public key cryptography and other public key cryptosystem. Block cipher principles, The Data Encryption Standard, A DES Example, Strength of DES, Block Cipher modes of operation. Public-Key Cryptography and RSA: Principles of Public-Key Cryptosystems, The RSA Algorithm, Diffie- Hellman Key Exchange. (Text 1: 3.1 to 3.5, 9.1, 9.2, 10.1)	9
III	Message authentication and Hash functions: Introduction, Cryptographic Hash Functions, Applications of Cryptographic hash functions, Two simple hash Functions. Message Authentication codes: Authentication Requirements, security of MAC's. Digital Signatures: Digital Signatures, Digital Signature Standard. (Text 1: 11.1, 11.2, 12.1 to 12.4, 13.1 & 13.4)	8
IV	Introduction to Cyber space: Fundamental notions of copyright law, Need to protect data in cyberspace, Types of data, Legal framework of data protection, IT act aim and objectives, Scope of the act, Secure electronic	8

Department: Electronics and Communication Engineering			Semester: 6
Subject: Sensors and Signal Conditioning			
Subject Code:	22EC6PE44	L – T – P – S:	42-0-0-48 (In Hrs)
		Credits:	3

Sl. No.	Course Objectives
1	Understand various technologies associated in manufacturing of sensors.
2	Acquire knowledge about types of sensors used in modern digital systems.
3	Learn about material properties required to make sensors.
4	Study intelligent sensors used in signal processing.

Module	Description	Hrs
I	Introduction to sensor bases measurement systems: Introduction, General concepts and terminology, sensor classification, primary sensors, material for sensors, micro sensor technology, magneto resistors, light dependent resistors, resistive hygrometers, resistive gas sensors, liquid conductivity sensors (Text1: 1.2 to 1.8)	9
II	Reactance variation and electromagnetic sensors: Introduction, Capacitive Sensors, Inductive Sensors, Electromagnetic Sensors. Signal Conditioning for Reactance Variation Sensors-Problems and Alternatives, ac Bridges Carrier Amplifiers, Coherent Detection, Specific Signal Conditioners for Capacitive Sensors, Resolver-to-Digital and Digital-to-Resolver Converters. (Text1: 2.4 to 2.10)	9
III	Self-generating sensors: Introduction, Thermoelectric sensors, piezoelectric sensors, pyroelectric sensors, photovoltaic sensors, electrochemical sensors. (Text1: 3.6 to 3.12)	8
IV	Digital and intelligent sensors: Introduction, position encoders, resonant sensors, sensors based on quartz resonators, SAW sensors, Vibrating wire strain gages, vibrating cylinder sensors, Digital flow meters. (Text 1: 4.1 to 4.12)	8
V	Sensors based on semiconductor junctions: Introduction, Thermometers based on semiconductor junctions, magneto diodes and magneto transistors, photodiodes and phototransistors, sensors based on MOSFET transistors, charge coupled sensors – types of CCD imaging sensors, ultrasonic-based sensors. (Text 1: 6.2 to 6.13)	8

Syllabus for the Academic Year 2025-26

Text Books:

Sl. No.	Text Book title	Author	Volume and Year of Edition
1	Ramon PallásAreny, John G. Webster	"Sensors and Signal conditioning",	John Wiley and Sons , 2 nd Edition, 2000

Reference Books:

Sl. No.	Text Book title	Author	Volume and Year of Edition
1	Wai Lok, Bin Gai	Sensor Signal and Information Processing	John Willey , 2 nd Edition, Feb 2020
2	Curtis D Johnson,	Process Control Instrumentation Technology	Pearson New International Technology , 4 th Edition, June 2020

Course Outcomes:

Course outcome	Descriptions
CO1	Label various types of sensors and their construction. (L1)
CO2	Identify the sensors for specific end user application. (L2)
CO3	Apply the knowledge of Sensors for developing prototype models. (L3)
CO4	Analyze the sensors performance in integrated system design. (L3)
CO5	Make use of appropriate sensors for signal conditioning. (L3)

Course Articulation Matrix:

PO/PSO CO	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PSO1	PSO2

Department: Electronics and Communication Engineering			Semester:	6
Subject: Introduction to Embedded Systems				
Subject Code:	22EC6OE51	L – T – P – S:	42-0-0-48	(In Hrs)
			Credits:	3

Sl. No	Course Objectives
1	Understand the architecture and features of microprocessors and micro controllers.
2	Analyze the embedded system design process and design metrics.
3	Study of single-purpose processors and their interfacing components.
4	Introduce the concepts of interrupts and real-time operating systems (RTOS).

Module	Description	Hrs
I	Microprocessors and microcontrollers: Introduction to Microprocessor and Micro controllers, RISC and CISC CPU architecture Harvard and Von Neumann Architectures, General Features and Architecture of Micro controllers. (Text 1: 2.1 – 2.7)	9
II	Introduction to embedded system design: Overview of embedded systems, embedded system design challenges, common design metrics and optimizing them, Processor Technology, Design Technology. (Text 2: 1.1 – 1.5)	9
III	Single purpose processors: Timers, Countersuit, PWM, LCD Controllers, Stepper Motor Controllers,A to D Converters Examples Problems. (Text 2: 4.1 – 4.8, 6.1 – 6.8)	8
IV	Interrupts: Basics, Shared Data Problem, Interrupt latency, Survey of software Architecture, Round Robin, Round Robin with interrupts, Function queues scheduling. (Text 3: 4.1 – 4.4, 5.1 – 5.4)	8
V	Introduction to RTOS: Tasks, States, Data, Semaphores, shared data, More Operating system services, Message Queues, Mail Boxes, Timers, Events. (Text 2: 6.1 – 6.3, 7.1 – 7.3)	8

Text Books:

Sl. No.	Text Book title	Author	Volume and Year of Edition
---------	-----------------	--------	----------------------------

Syllabus for the Academic Year 2025-26

1	"The 8051 Microcontroller and Embedded Systems"	Muhammed Ali Mazidi, Janice Gillispie Mazidi, Rolin D. McKinlay.	Pearson Education, Second Edition, 2014.
2	Embedded System Design: A Unified Hardware/Software Introduction.	Frank Vahid, Tony Givargis	Pearson Education, Second Edition, 2014 ISBN:9971- 51-405-2
3	An Embedded software Primer	David E. Simon	CISCO Press, 2017. ISBN:81-7758-154-62006

Reference Books:

Sl. No.	Text Book title	Author	Volume and Year of Edition
1	Embedded Systems: Architecture and Programming	Raj Kamal,	TMH. 2008 Education Asia / PHI Indian Reprint 2002
2	Introduction to Embedded Systems	Shibu K. V	McGraw-Hill Education(INDI A) Private limited 2012
3	Embedded Systems: A Contemporary Design Tool	James K	John Wiley India Pvt. Ltd 2014

Course Outcomes:

Course outcome	Descriptions
CO1	Explain the architecture and features of microprocessors and microcontrollers.(L2)
CO2	Differentiate between RISC and CISC, Harvard and Von Neumann architectures.(L3)
CO3	Analyze the challenges in embedded system design and optimization techniques.(L3)
CO4	Illustrate the working of timers, counters, LCDs, PWM, stepper motor controllers and ADCs.(L3)
CO5	Apply interrupt handling mechanisms and RTOS concepts such as semaphores, queues, and scheduling.(L3)

SRI SIDDHARTHA ACADEMY OF HIGHER EDUCATION TUMAKURU

 Department is Accredited by NBA
Syllabus for the Academic Year 2025-26

Department: Electronics and Communication Engineering			Semester: 6
Subject: Pattern Recognition			
Subject Code:	22EC6OE52	L – T – P – S:	42-0-0-48 (In Hrs)
			Credits: 3

Sl. No	Course Objectives
1	Understand the fundamental concepts of pattern recognition systems.
2	Learn the concepts of Probability theory, random variables, joint distribution and density function.
3	Study the principles of statistical decision and non-parametric decision making.
4	Acquire the knowledge of various clustering methods.

Module	Description	Hrs
I	Introduction to Pattern Recognition: Introduction, Machine perception-an example, pattern recognition systems, the design cycle, learning and adaptation, applications of pattern recognition, statistical decision theory, image processing and analysis. (Text 2: 1.1-1.5, Text 1: 1.1 – 1.3)	6
II	Probability: Introduction, Probabilities of events, random variables, joint distributions and densities, moments of random variables, estimation of parameters from samples, problems. (Text 1: 2.1 – 2.6)	8
III	Statistical decision making: Introduction, Bayes' theorem, multiple features, conditionally independent features, decision boundaries, unequal costs of error, Leaving-One-Out Technique, problems. (Text 1: 3.1 -3.5, 3.8)	9
IV	Nonparametric decision making: Introduction, histograms, kernel and window estimators, adaptive decision boundaries, adaptive discriminant functions, problems. (Text 1: 4.1 – 4.4, 4.6)	9
V	Clustering: Introduction, Hierarchical clustering: Agglomerative clustering algorithm, Single-Linkage algorithm, Complete-Linkage algorithm, Average-Linkage algorithm, Wards method, Partitioned clustering: Forgý's algorithm, Kmeans algorithm problems. (Text 1: 5.1 – 5.3)	8

SRI SIDDHARTHA ACADEMY OF HIGHER EDUCATION TUMAKURU
(Deemed to be University, Accredited A⁺ Grade by NAAC, New Delhi.)
SRI SIDDHARTHA INSTITUTE OF TECHNOLOGY- TUMAKURU
(A constituent College of Sri Siddhartha Academy of Higher Education, Tumakuru.)

Syllabus for the Academic Year 2025-26

Text Books:

Sl. No.	Text Book title	Author	Volume and Year of Edition
1	Pattern Recognition and Image Analysis.	Earl Gose, Richard Johnsonbaugh, Steve Jost	Pearson, 978-93-325-4979-1, 2015
2	Pattern Classification.	Richard O. Duda, Peter E. Hart, David G. Stork	Wiley, 978-81265-1116-7, 2009

Reference Books:

Sl. No.	Text Book title	Author	Volume and Year of Edition
1	Pattern Recognition.	Konstantinos Koutroumbas Sergios Theodoridis	Academic Press, 2008 ISBN: 978-1-597-49272-0
2	Pattern Recognition and Machine learning.	Christopher M Bishop	Springer, 2009 ISBN-13:978-0-387-31073-2
3	Pattern Recognition.	Narasimha Murthy	Universities Press, 2011 ISBN-13: 978-8173-717-253

Course Outcomes:

Course outcome	Descriptions
CO1	Outline various techniques involved in pattern recognition. (L2)
CO2	Apply the knowledge of probability to statistical and non-parametric decision making. (L3)
CO3	Analyze classification problems and estimate classifier performance. (L3)
CO4	Interpret the principles of clustering approaches to pattern recognition. (L2)
CO5	Classify decision-making algorithms in pattern recognition (L2)

Department: Electronics and Communication Engineering			Semester: 6
Subject: Robotics			
Subject Code:	22EC6OE53	L – T – P – S:	42-0-0-48 (In Hrs)
			Credits: 3

Sl. No.	Course Objectives
1	Acquire the knowledge of basic components of a robot anatomy.
2	Learn the various types of end effectors and sensors.
3	Understand programming concepts of robot kinematics.
4	Study the sensors and devices in robot application and vision system.

Module	Description	Hrs
I	Fundamentals of robot: Introduction, Robot Anatomy , Co-ordinate Systems, Work Envelope Types and Classification- Specifications-Pitch, Yaw, Roll, Joint Notations, Speed of Motion, Pay Load- Robot Parts and their Functions-Need for Robots-Different Applications. (Text 1: 1.1 to 1.6, 2.1 to 2.5)	8
II	Robot drive systems and end effectors: Introduction, Pneumatic Drives, Hydraulic Drives, Mechanical Drives, Electrical Drives, D.C. Servo Motors, Stepper Motors, A.C. Servo Motors-Salient Features, Applications and Comparison of all these Drives, End Effectors-Grippers-Mechanical Grippers, Pneumatic and Hydraulic- Grippers, Magnetic Grippers, Vacuum Grippers; Two Fingered and Three Fingered Grippers; Internal Grippers and External Grippers; Selection and Design Considerations. (Text 2: 5.1 to 5.4)	9
III	Kinematics: Introduction, Direct kinematic model: Mechanical structure and notations, Description of joints and links. Kinematic modeling of the manipulator. Denavit – Hartenberg Notation. (Text1: 3.1 to 3.4)	9
IV	Path planning: Introduction, Definitions of Trajectory planning, Trajectory planning problem, terminology, steps in trajectory planning, classification of trajectory planning, types of trajectory function tasks, joint space techniques, Cartesian space technique. (Text 1: 7.1 to 7.3)	8
V	Robotic sensors and vision: Introduction, Definitions, Sensors and Robotics, Kinds of sensors used in Robotics. Robotic Vision, Industrial applications of vision –controlled robotic vision systems. (Text 1: 9.1 to 9.5)	8

Reference Books:

Sl. No.	Text Book title	Author	Volume and Year of Edition
1	Robotics Control, Sensing, Vision and Intelligence	Fu.K.S, Gonzalz.R.C., and Lee C.S.G.,	McGraw-Hill Book Co., 2000 Reprint
2	Robotic engineering- An Integrated Approach	Richard D. Klafter, Thomas A. Chmielewski and Michael Negin	Prentice Hall India Learning Private Limited, 1997
3	Robotics and Image Processing	Janakiraman. P. A	McGraw Hill Education India Pvt Ltd, 2002

Course Outcomes:

Course outcome	Descriptions
CO1	Outline the Robotic basics and their classification.(L1)
CO2	Analyze the drive system and End effector of Robotics. (L4)
CO3	Develop and apply kinematic models using Denavit–Hartenberg notation and implement them using simulation software(L2).
CO4	Interpret the Kinematics and path planning for Robotic system. (L3)
CO5	Design Robotic sensors for vision. (L3)

Department: Electronics and Communication Engineering		Semester:	5
Subject: Mini Project			
Subject Code:	22ECMP607	L – T – P – S:	0 – 0 – 4 – 2
Description			
Guidelines for Student Project Work: ✓ Students (Maximum-4, becomes one Group) shall carry out a detailed survey on the area and the topic on which they are interested to do the Mini project work. ✓ Each group instructed to prepare synopsis of three different topics with title of the Mini project work and submit to class teachers. ✓ Project Evaluation Committee (PEC) will review the synopsis and suggest suitable title in relevance to recent trends in Electronics and Communication Engineering domain and allot the guide. ✓ Each group instructed to give a detailed presentation and justify the title of the project with problem definition. ✓ Each group meet the guide frequently (every two weeks) with Project Dairy (100 Pages ruled note book) and discuss the work progress. ✓ Each guide has to write the observations and recommendations in the Project Diary, during every meeting. Get the signature of the Guide and HoD. ✓ After successful implementation of the Project work each group has to make an arrangement for final demonstration of the work in the department. ✓ Concerned Guide and PEC members evaluate the work as per Rubrics during the Project work Seminar, as per calendar of events. ✓ Final presentation involves: Introduction, Literature Survey (Minimum 06 papers), Problem Statement, Motivation, Objectives, Proposed methodology for solving societal problems.			
CIE-Continuous Internal Evaluation: Continuous evaluation will be done by respective Project Guides and PEC members based on the Regularity, Technical Knowledge and Competence, Programming Skills, Communication Skills, Demonstration skills, Collaborative Learning and Documentation Skills of the students.

Department: Humanity and Sciences			Semester:	6
Subject: Skill Development-III(Technical Skills)(Preplacement Training)				
Subject Code:	22SK608	L – T – P – S:	14-0-0-16	(In Hrs)
			Credits:	1

Sl. No.	Course Objectives
1	To build strong aptitude, logical reasoning, and problem-solving abilities essential for competitive assessments.
2	To develop professional grooming, workplace ethics, and effective interview skills for career readiness.
3	To enhance communication proficiency through structured email, virtual communication, and business etiquette.
4	To impart solid foundations in C and C++ programming, covering structured and object-oriented paradigms.
5	To equip students with data structure and algorithmic knowledge to solve real-world computational problems.

Module	Description	Hrs
I	Reasoning Aptitude : Logical Aptitude – Syllogism, Venn-diagram method, Three statement syllogism, Deductive and inductive reasoning. Introduction to puzzle and games organizing information, parts of an argument, common flaws, arguments and assumptions. Linear Seating Arrangement: Single or Double rows facing each other or away from each other in the same direction Circular Seating Arrangement: Uni- & Bi-directional problems on Circular, Square, Rectangular, Hexagonal tables Coding Decoding: Letter Coding, Number Coding, symbol coding Crypt arithmetic: Basic concepts , addition , subtraction, multiplication of coded alphabets, Types of cryptarithm Clocks and Calender Reasoning – a. Verbal – Blood Relation, Sense of Direction, Arithmetic & Alphabet. Non- Verbal reasoning – Visual Sequence, Visual analogy and classification. Analytical Reasoning – Single & Multiple comparisons, Linear Sequencing. Verbal Aptitude: Brush Up on Reading Comprehension, Para Jumbles,	3

(Deemed to be University, Accredited A⁺ Grade by NAAC, New Delhi.)
SRI SIDDHARTHA INSTITUTE OF TECHNOLOGY- TUMAKURU
(A constituent College of Sri Siddhartha Academy of Higher Education, Tumakuru.)
Department is Accredited by NBA
Syllabus for the Academic Year 2025-26

	Sentence Completion, Antonyms/Synonyms, Error in Sentences, Sentence Rearrangement, Idioms and Phrases, Verbal Analogies, Articles. Quantitative Aptitude – I: Permutation and Combination: Understanding the difference between the permutation and combination, Rules of Counting-rule of addition, rule of multiplication, factorial function, Concept of step arrangement, Permutation of things when some of them are identical, Concept of $2n$, Arrangement in a circle. Probability: Single event probability, multi event probability, independent events and dependent events, mutually exclusive events, non-mutually exclusive events, combination method for finding the outcomes. Quantitative Aptitude – II: Brush Up on: Number System, Percentage, Interest : Simple Interest, Compound Interest, Mixed Interest, Installments. Data Interpretation: Approach to interpretation – simple arithmetic, rules for comparing fractions, Calculating (approximation) fractions, short cut ways to find the percentages, Classification of data– Tables, Bar graph, line graph, Cumulative bar graph, Pie graph, Combination of graphs. Combination of table and graphs Quantitative Aptitude – III: Data Sufficiency: Questions based on > Quantitative aptitude > Reasoning aptitude > Puzzles Quantitative Aptitude – IV: Ratio and Proportion - Simple Ratios, Compound Ratios, Comprehend and Dividend, Direct & Indirect Proportions, Problems on ages, Mixtures & Allegation Speed, Time and Distance, Relative Speed, Average Speed, Problems on Train, Boat & Stream, Time and Work, Work Efficiency, Work & Wages Pipes & Cisterns	
II	Grooming: Work Ethic and Professionalism: Defining Work Ethic, Traits and Characteristics, The Importance of Reliability and Accountability, Maintaining Confidentiality, Building a Positive Professional, Image Balancing, Professionalism with Personal Authenticity Interview Skills: Introduction to Interviews, The Purpose of an Interview, Different Types of Interviews: Telephonic, Face-to-face, Panel, Behavioral, and Technical. Before the Interview: Researching the Company/Organization, Analyzing the Job Description, Preparing Relevant Answers for Common Interview Questions. During the Interview: Dress Code and Personal Grooming, Body Language: Eye Contact, Posture, and Handshake, Listening Actively and Responding Clearly, Asking Thoughtful Questions to the Interviewer Technical vs Behavioral Interviews: Understanding Technical Skill Evaluation, STAR Technique (Situation, Task, Action, Result) for Behavioral Questions.	3

SRI SIDDHARTHA ACADEMY OF HIGHER EDUCATION TUMAKURU
(Deemed to be University, Accredited A⁺ Grade by NAAC, New Delhi.)
SRI SIDDHARTHA INSTITUTE OF TECHNOLOGY- TUMAKURU
(A constituent College of Sri Siddhartha Academy of Higher Education, Tumakuru.)
Department is Accredited by NBA
Syllabus for the Academic Year 2025-26

	Handling Challenging Questions and Situations: Addressing Gaps in Employment, Discussing Strengths, Weaknesses, and Failures, Navigating Salary Discussions. After the Interview: Crafting a Follow-up Email or Letter, Reflecting on Interview Performance, Preparing for the Next Steps	
III	Email and Virtual Communication: Email Etiquette: Do's and Don'ts, Crafting Effective Emails, Clarity, Brevity, and Tone, Best Practices for Virtual Meetings (Zoom, Teams, etc.), Virtual Communication Tools, Navigating Time Zones, Cultural Differences, and Other Challenges Business Etiquettes: Greetings and Introductions in Business Settings, Business Dining Etiquette, Dress Code and Personal Grooming, Electronic Etiquette: Phone, Email, and Social Media, International Business Etiquette: Understanding Cultural Differences. Technical skills: Competitive Coding with C Programming: Covered Topics. C Programming (A): Data Types, Operators, and Expressions, Input and Output Operations, Control Flow: Branching and Looping- Statements and Blocks, If..Else, Switch, Nesting of If..Else, GOTO Statement, The While Statement, The For Statement, The Do Statement, Jumps in Loops C Programming (B): Arrays and Strings, One-dimensional Arrays, Initialization of One-dimensional Arrays, Two-dimensional Arrays, Initializing Two-dimensional Arrays, Multi-dimensional Arrays, Dynamic Arrays, Declaring and Initializing String Variables, Reading Strings from the Terminal, Writing Strings to the Screen, String Handling Functions- Operations on Strings. C Programming (C): User-defined Functions and Structures, Basics of	3
IV	C++: Object oriented Programming: Class and Objects, Dynamic Memory Management POP, OOPs in C++, Console Input / Output in C++, Comment lines in C++, Importance of function prototyping in C++, Function overloading, Inline functions and default arguments, Scope Resolution Operator, Structures, Defining function outside the class, Friend functions, Friend class, Array of class objects, Passing class objects to and returning class objects from functions, Nested classes, Namespaces, Dynamic memory allocation using new and de-allocation, new handler function.	3
V	Data Structures: Introduction to Data-structures, Arrays and Strings, Recursion Data Structures, Types, Arrays, Structures, Self-Referential Structures, and Unions, Pointers and Dynamic Memory Allocation, Operations related data-structures Functions. Representation of Linear Arrays in Memory, Dynamically allocated arrays, Sorting and searching in arrays, Operations on arrays: inserting, deleting traversing, Stacks, Queues, Linked lists, Stack operations, implementing queue using stack, Applications of stack: converting Infix to postfix expressions, Evaluating	2

Syllabus for the Academic Year 2025-26

	expressions, Using stacks to represent arrays, Types of queues: Ordinary queue, Circular queue, Priority queue, Dequeue, Implementing queue using multiple stacks, Drawback in stacks and arrays, Advantages of linked list over stacks and queues with memory examples,• Types of linked list, Writing examples on singly linked list, Doubly linked lists and circular linked lists, Various operations like insertion deletion and searching for a element in linked list and reversing linked list,• Implementing arrays queues and stacks using linked list. Trees, Graphs and Traversal Methods, Sorting and Searching, Hashing: Creating trees using linked list data-structures, Binary tree programming examples, Types of binary trees, Solving problems on Inorder Preorder and Postorder traversal of Binary trees, Binary tree operations, Writing threaded binary trees, Insertion deletion and traversal of Binary search trees, Applications of trees, valuation of expressions using trees, Programming examples, Different types of representing graphs: Adjacency list and matrix representation, Various graph operations and terminologies Hashtag: Hashtag Programming, Hash-table organization, Hashing functions, Static and Dynamic hashing. Algorithms: Sorting Algorithm-1.Bubble sort, 2.Selection sort, 3.Insertion sort, 4.Merge sort, 5.Quick sort, 6.Shell sort, 7.Heap sort Searching Algorithm: 1.Linear search, 2.Binary search, Greedy Algorithm, Divide & conquer Algorithm, Dynamic Programming.
